

DIRECTIONS FOR USE

READ INSTRUCTIONS CAREFULLY. ALWAYS WEAR GLOVES, Goggles AND PROTECTIVE CLOTHING. PHALTAN Rose & Garden Fungicide is diluted in water as indicated below. For best results apply with a BIRTH SPRAYETTE or pump sprayer. To use in a designated amount of PHALTAN Rose & Garden Fungicide mix the water to make a thick smooth paste then add required amount of water. Apply during application the water at the D. Do not allow to start.

Plant	Disease	Application
Apple	Scab	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Banana	Black Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Berberry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Blackberry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Blueberry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Cherry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Citrus	Scab	1/2 Tablespoon per gallon of water. Make thick paste before final dilution and addition of insecticide. Do not use combination on citrus. FOR ROSES - Apply fungicide weekly during spring and fall in new sections. During summer months apply PHALTAN Rose & Garden Fungicide at regular intervals for disease control. Cucumber	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Drumstick	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Eggplant	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Fig	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Grape	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Guava	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Honeydew	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Kumquat	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Lemon	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Lime	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Mango	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Marigold	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Medicinal Herb	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Orange	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Peach	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Pear	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Pineapple	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Pistachio	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Potato	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Raspberry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Rose	Black Spot, Powdery Mildew	1/2 Tablespoon per gallon of water. Make thick paste before final dilution and addition of insecticide. Do not use combination on citrus. FOR ROSES - Apply fungicide weekly during spring and fall in new sections. During summer months apply PHALTAN Rose & Garden Fungicide at regular intervals for disease control. Add BIRTH Insect Spray or ORTHO Insect Spray only when necessary for insect control.
Strawberry	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Tangerine	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Watermelon	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.
Yucca	Leaf Spot	1/2 Tablespoon per gallon of water. Treat at least weekly during periods of rapid new growth and severe infection and twice weekly during periods of rapid new growth and severe infection caused by cool humid rains or high humidity.

CITRUS Citrus Scab - Use 1/2 Tablespoon per gallon of water. Make thick paste before final dilution and addition of insecticide. Do not use combination on citrus. **FOR ROSES** - Apply fungicide weekly during spring and fall in new sections. During summer months apply PHALTAN Rose & Garden Fungicide at regular intervals for disease control. Add BIRTH Insect Spray or ORTHO Insect Spray only when necessary for insect control.

COMBINATION INSECT AND DISEASE CONTROL SPRAY FOR INSECT CONTROL AND LISTED DISEASES - Add 1 Teaspoon BIRTH Insect Spray or 1 to 1 1/2 Teaspoons of ORTHO Insect Spray depending on what insects are present for each square of diluted spray. Always mix diluted amount PHALTAN Rose & Garden Fungicide in the water to form a thick paste before final dilution and addition of insecticide. Do not use combination on citrus. **FOR ROSES** - Apply fungicide weekly during spring and fall in new sections. During summer months apply PHALTAN Rose & Garden Fungicide at regular intervals for disease control. Add BIRTH Insect Spray or ORTHO Insect Spray only when necessary for insect control.

Do not apply more than two consecutive applications of ORTHO Insect Spray in combination with PHALTAN Rose & Garden Fungicide. Do not spray during periods of extremely high temperatures (90 F) as they may occur.

FOLIAGE FEEDING PLUS Insect and Disease Control - To foliage feed plants twice a month add ORTHO Rose & Garden Food B 12-4 at 2 teaspoons per gallon to PHALTAN Rose & Garden Fungicide of the above combination. Note caution on product labels.
