GARDEN WEED AND FEED

GRANULES 8-12-4

GARDEN WEED AND FEED GRANULES 8-12-4

READ ENTIRE LABEL, USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

KEEP PESTICIDE IN ORIGINAL CONTAINER.

DIRECTIONS: ORTHO GARDEN WEED AND FEED is designed to perform two important functions:

1. Feeds Flowers: Aster, Amaranthus, Asters, Begonia, Chrysanthemum, Dahlia, Daylilies, Dianthus, Marigold, Nasturtium, Pansy, Petunia, Zinnia. Ground Covers: Ajuga, Gazania, Hypericum, Ice Plant, Ivy, Pachysandra, Periwinkle, Sedum, Strawberry (ornamental).

Trees & Shrubs: Espalier, Boxwood, Camellia, Chamaecyparis, Citrus, Dogwood, Eucalyptus, Fir, Hemlock, Holly (American & Japanese), Juniper, Leucodaphne, Lilac, Linden, Magnolia, Maple, Oak, Pines, Pine, Podocarpus, Rhododendron, Rose, Spruce, Yucca, Yew (Taxus).

2. Prevents over 20 species of Broadleaf and Grassy Weeds such as Bermuda-grass, Crabgrass, Florida Pusley, Goosegrass, Nutsedge, Purslane, and Spurge from getting started in rose beds and around flowering plants, trees and shrubs listed above. ORTHO GARDEN WEED AND FEED WILL NOT KILL WEEDS THAT ARE ALREADY GROWING.

WHEN TO APPLY: ORTHO GARDEN WEED AND FEED can be applied any time during the growing season but for maximum weed control, the first application should be made in the spring when roses and other plants start to grow.

A second application in 8 weeks will assure continued weed control. Wait one week after transplanting shrubs and flowers before applying ORTHO GARDEN WEED AND FEED to avoid injuring the young plants. After seeding annual flowers wait until growth is 3 to 5 inches high.

HOW TO APPLY: For best results, follow these directions carefully:

1. Before applying, REMOVE ALL EXISTING BROADLEAF AND GRASSY WEEDS, since ORTHO GARDEN WEED AND FEED kills sprouting seeds, not established weeds.

2. Spread product EVENLY over the area to be treated. Contents of this container will cover 200 square feet for control of most small seeded annual weeds. TO CONTROL BERMUDA GRASS AND BERBERIS, COVER ONLY 150 SQ. FT. WITH CONTENTS.

3. Within minutes after spreading the granules, ORTHO GARDEN WEED AND FEED should be thoroughly mixed into the top 2 to 3 inches of soil with a rake or other garden tool.

4. After mixing into the soil, water the treated area lightly for 3 to 5 minutes. When watering, remove any of the product adhering to plant foliage.

USE PRECAUTIONS: ORTHO GARDEN WEED AND FEED may cause injury under certain soil and climate conditions if directions are not followed. Use only for recommended purposes and at recommended rates. Do not use around Alyssum, Balsam, Coleus, Lavender, Salvia bedding plants, flowering buds, Wisteria shrubs or other plants not listed on this label as severe injury may result.

DO NOT USE ON LAWNS

GUARANTEED FERTILIZER ANALYSIS, MIN.

Total Nitrogen (N)	8%
4.05% Ammonia Nitrogen	
2.60% Urea Nitrogen	
1.35% Water Insoluble Nitrogen*
