

**DIRECTIONS FOR USE**

1. Use only on trees, shrubs, vines, and other woody plants. Do not use on lawns, flowers, or other desirable plants.

**READ ENTIRE LABEL USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS AND DIRECTIONS**

ORTHO Poison Ivy Control contains 2,4-D and MCPP. This product is designed to give easy control of poison ivy and poison oak around homes and buildings in areas such as fence rows and vacant lots and on tree trunks. A foam marker has been added to aid in the complete coverage of all leaves.

**DIRECTIONS**

1. Point arrow on button toward red mark on edge of metal rim at top of can to direct spray properly and provide complete emptying of container.
2. Shake can well before use and occasionally during use.
3. Point arrow on button toward poison ivy and poison oak and spray to cover each leaf thoroughly. Do not overspray. The white foam marker will indicate when leaves have been thoroughly covered.
4. Spray only when air is calm to avoid drift to desirable plants. Poison ivy and poison oak may be sprayed any time after leaves are fully developed in the spring.
5. When poison ivy is growing up poles, fence posts or trunks of trees, spray all poison ivy leaves around the base and up to a height of 3 to 4 feet. Avoid spraying the foliage of desirable trees or shrubs. If poison ivy is growing on private land, to avoid damage to these plants, cut ivy vines at base and apply ORTHO Poison Ivy Control to cut.
6. Under ordinary summer weather conditions, poison ivy and poison oak leaves turn brown in 10 days to 2 weeks after spraying. The chemicals are translocated throughout the entire plant, killing roots and top.

**IMPORTANT:** Dead poison ivy and poison oak can cause skin irritations. Avoid any contact with bare skin or face. Do not burn dead poison ivy stems or leaves. Smoke from burning poison ivy and poison oak has caused severe injury to eyes and lungs when inhaled.

**CAUTION:** Avoid contact with skin, eyes or clothing. Wash hands after use. **Note to Physicians:** This product contains 2,4-D and MCPP. See back panel for additional cautions.

When used as directed, this product will kill poison ivy and poison oak. It is not intended for use on lawns, flowers, or other desirable plants. Do not use on trees, shrubs, vines, or other woody plants that are not listed on the label. Do not use on lawns, flowers, or other desirable plants.
