KEEP PESTICIDE IN ORIGINAL CONTAINER.  
KEEP BAG CLOSED WHEN NOT IN USE—STORE IN A DRY PLACE.

### DIRECTIONS

- ORTHO St. Augustine Weed & Feed rejuvenates starved and weedy lawns by:
1. Providing a fast-acting fertilizer that will give you a green lawn.
  2. Controlling unsightly broadleaf weeds such as Plantain, Pennywort, Chickweed, Creeping Charlie, Florida Pussley, Lippia, Evening Primrose, Florida Betony, Rabbit Tobacco, Dandelion, Oxalis, Pigweed and Toadflax that compete with your grass for water and nutrients.
  3. Preventing Sedge, Crabgrass, Spotted Spurge and Paspalum from becoming established in your lawn.
- WHEN TO APPLY**
1. To control the broadleaf weeds listed under number 2 above and fertilize grass, apply anytime the weeds are present and actively growing (usually early Spring is best timing). Repeat in two months if needed. Length of time required to control established broadleaf weeds is dependent upon their stage of growth. Mature weeds may take as long as 4 to 6 weeks to completely die.
  2. To prevent the growth of Sedge, Crabgrass, Spotted Spurge and Paspalum and fertilize grass, apply in January, February or March before these weeds germinate. This product will not control these weeds if they are present in the lawn at time of application.
