#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### READ ENTIRE LABEL USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

ORTHO Premium Professional Spring & Fall Crab Grass Control is recommended for use in either Spring or Fall on home lawns, parks and golf courses and around listed ornamental plants and  
50' covers to control crab grass, annual bluegrass and the other listed weeds.

#### WEEDS CONTROLLED:

Barnyardgrass	Mary Crabbgrass	Lambsquarters	Redroot Pigweed
Annual Bluegrass	Large Crabbgrass	Dead Nettle	Shepherdspur
Potomac Bluegrass	Goosegrass	Orchardgrass	Tall Fescue
Smooth Crabbgrass			

#### NOW TO USE

Application of ORTHO Premium Professional Spring & Fall Crab Grass Control must precede germination of weed seeds in the soil. Weeds will germinate in the soil from 4 to 8 weeks before it is visible above the lawn sod. If weeds are visible, it is too late to apply ORTHO Premium Professional Spring & Fall Crab Grass Control. For Crabgrass Control, use in the fall (Sept.-Oct.) or in the early spring (Apr.)—Apply before forsythia blooms have fallen in the spring) before emergence of Crabgrass and other annual spring weeds. For Annual Bluegrass (Poa annua) Control, apply in late summer/early fall before annual bluegrass germinates.

It is recommended for use on mineral soils only. Do not apply peat moss to lawn, ground covers or established ornamentals before treating with ORTHO Premium Professional Spring & Fall Crab Grass Control.

#### Important Application Tips

- 1 Before applying, remove leaves, dead or tall grass and other debris. Uniform coverage is important. To prevent drift, do not apply on a windy day.
- 2 After applying this product, water treated area thoroughly to wash the particles off the grass and down into the soil where the weed seeds are located.
- 3 Do not rake or dig in the treated area. Disturbance of the soil surface may break the protective chemical barrier allowing Crabgrass and other listed weeds to grow.
- 4 Since effective preemergence herbicides prevent most grass seeds from germinating, do not reseed treated lawn for at least 4 months after application of this product. Proper fertilization and watering will encourage the existing turf grass to fill in thin or bare spots. Renovate the area to be reseeded by raking thoroughly, mixing sterilized (weed free) organic mulch into the top 2 inches of soil (50 lb./volume).
- 5 Newly seeded lawns should not be treated until they have been mowed 3 times.

#### Timing of Application

**GRASS LAWNS:** Use on the following well-established turf grasses:

Bahia	Centipede	Perennial Bluegrass	Red Top
Bentgrass spp	Fescue spp	Perennial Ryegrass	St. Augustine
Bermudagrass	Pensacola	Poa Trivialis	Zoysia

**Orchard Lawns:** Apply to orchard lawns at time of seeding or 1 to 2 months thereafter.

**Ornamentals and Ground Covers:** Apply only to the following well-established ornamentals and ground covers:

Abeba	Daffodil	Juniper	Ranunculus
Ajuga	Dark	Margold	Sandankwa
Alyssum	Daisy	Monterey Cypress	Sedum
Aster	Daphne	Monterey Pine	Star Jasmine
Azalea	Festuca	Myrtle	Stock
Azara	Freesia	Narcissus	Sweet Pea
Bachelor's Button	Gazania	Paeonia	Tulip
Bonwood	Gladiolus	Pansy	Tobea
Calendula	Holly	Pelargonium	Wall Flower
Campanula	Hypéricum	Primrose	Wild Strawberry
Candytuft	Ice Plant	Privet	Xylostea
Coral Bell	Ivy	Pyranthia	Zinnia

For control of CRABGRASS, apply at the recommended rate (see Rates of Application) anytime from fall (Sept. or Oct.) through early spring, for spring and summer control. Application must be made prior to germination of the Crabgrass (see Directions for Application).

For control of ANNUAL BLUEGRASS AND OTHER ANNUAL WEEDS, apply at the recommended rate (see Rates of Applications) before the weeds germinate in the soil.

In southern or western states where germination of crabgrass, annual bluegrass and other annual weeds extends into the late summer and early fall, a second application should be made at the recommended rates 4 to 5 months after the initial application.

#### RATE TO APPLY

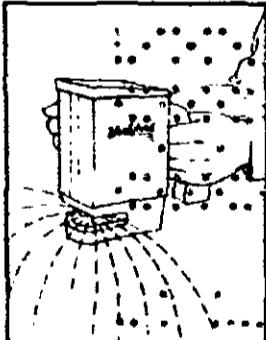

Apply at the rate of 4 lbs / 1000 sq ft. Contents of this bag covers 2500 sq ft.

	SPRING	SUMMER	FALL
Crabgrass	X		X
Ann. Bluegrass		X	
Annual Weeds	X	X	X

#### FAST, EASY APPLICATION WITH ORTHO SPREADERS

**ORTHO Broadcast Spreader**  
Use setting No. 6. Spread width 8 ft.  
Apply 10 lbs. to cover 2,500 sq. ft.  
(50 x 50') Cover lawn in one direction. Do not use cross pattern.

**ORTHO WHIRLYBIRD Spreader**  
Use setting No. 3. Apply 2 WHIRLYBIRDs to 1 lb. to 250 sq. ft. (10 x 25'). Start cranking the WHIRLYBIRD handle before depressing thumb lever. To ensure complete coverage spread in cross-cross pattern by applying the second WHIRLYBIRD full at right angles to the first. For application in confined areas and along border plantings, control of swath width can be obtained by holding the WHIRLYBIRD closer to the ground or cranking the handle in the opposite direction when using.

**ORTHO Drop Spreader**  
Use setting No. 6. Cover lawn in one direction. Do not use cross-cross pattern. To ensure complete coverage overlap wheel tracks. When making turns, shut off spreader to avoid overapplication.

Swath width adjustment will affect coverage. Therefore, Chevron makes no warranty as to the uniformity of coverage obtained from the settings listed.

#### STORAGE AND DISPOSAL

Keep pest control in original container. Do not contaminate food or foodstuffs. Do not reuse empty container. Wrap container and put in trash collection.

**NOTICE:** Buyer assumes all responsibility for safety and use not in accordance with directions.

#### ORTHO'S MONEY BACK GUARANTEE

If you are not satisfied with the results after using this product, send us this guarantee with your sales receipt. Your refund check will be mailed to you promptly.

**PRECAUTIONARY STATEMENTS**      **CAUTION**      **HAZARDS TO HUMANS (& DOMESTIC ANIMALS)**  
Causes eye irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Avoid inhalation of mist. In case of eye contact, flush thoroughly with water for at least 15 minutes. Call a physician. Wear safety goggles and rubber gloves when handling concentrate.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

**STORAGE AND DISPOSAL**

1. Prohibitions - Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.
2. Pesticide Disposal - Pesticide, spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to applicable federal, state, or local procedures.
3. Container Disposal - Triple rinse (or equivalent). Then offer for recycling or reconditioning, or dispose of in a sanitary landfill or by incineration if allowed by state and local authorities.
4. General - Consult federal, state or local disposal authorities for approved alternative procedures such as limited open burning.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. FAIR 2 is a tailor made formulation exclusively for tobacco use. The active ingredient is the time tested and classic growth retardant, Maleic Hydrazide, in the form of the potassium salt. This formulation contains an "agricultural" surfactant (wetting agent) to facilitate better "sticking," especially under adverse weather conditions. It is necessary to apply FAIR 2 at the correct time, in the correct amounts, and in equal amounts to each plant, in order to obtain the optimum sucker control. Only the upper 1/3 to 1/2 of the plant needs to be sprayed for best results. FAIR 2 is absorbed by the tobacco leaves and spreads throughout the entire plant. Please follow directions carefully.

**SPRAY APPLICATION**

FAIR 2 can be applied by tractor or animal drawn sprayer or with a compressed air shoulder sprayer. Any number of nozzles may be used and it can be applied in the same manner as insecticides. Spray one or more rows at a time, wetting only the upper 1/3 or 1/2 of the plants. When using a compressed air shoulder sprayer with a single nozzle, spray one side of each tobacco row while walking at a constant rate, using a uniform motion to moisten the upper 6 or 8 leaves of each plant, and apply equal amounts of spray to each plant. Make sure to use a nozzle that delivers a fine mist spray. Apply FAIR 2 in 20 to 50 gallons of water per acre. DO NOT use less than 20 gallons of water per acre. For burley, flue cured, cigar (Pennsylvania and Wisconsin) and Maryland tobacco use 1 gallon FAIR 2 per 6000 plants per acre or 1 1/8 to 1 1/2 gallons FAIR 2 per 8000 plants per acre. On small plots, use 1 1/8 to 1 1/2 pints of FAIR 2 per 1000 plants in 3 gallons of water. For dark tobacco, use double the above amounts - for example, use 2 gallons of FAIR 2 per 6000 plants per acre or 2 1/4 pints of FAIR 2 per 1000 plants in 3 gallons water.
