**CONTAIN HERBICIDE PLUS DIURON TANK MIXTURE FOR CONTROL OF KOCHIA  
AND OTHER WEEDS IN NONCROP AREAS AND NONCROP FARMSTEADS**

**OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE  
CONTAIN HERBICIDE AND DIURON LEAFLET LABELS BEFORE USING.  
ALWAYS FOLLOW THE MORE RESTRICTIVE LABEL.**

**ENVIRONMENTAL HAZARDS**

DO NOT apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. DO NOT contaminate water when disposing of equipment washwaters.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of herbicide application.

**GENERAL INFORMATION**

CONTAIN herbicide plus labeled rates of Diuron may be applied either preemergence or postemergence to weeds in noncrop areas such as utility installations, non-irrigation ditch banks, fence rows, around farm buildings and other areas in noncrop farmsteads where vegetation is undesirable.

CONTAIN plus Diuron may be applied preemergence at any time of the year. DO NOT apply to ground that is frozen. Best results are obtained if applied shortly before weed growth begins.

**APPLICATION INSTRUCTIONS**

Apply a tank mixture of CONTAIN herbicide at 4 to 12 pints per acre plus Diuron at 4 to 12 lbs. a.i. per acre. To determine the proper rate for CONTAIN herbicide refer to the "WEEDS CONTROLLED" section of the leaflet label.

**PREEMERGENCE:** CONTAIN plus Diuron may be applied preemergence at any time of the year except when ground is frozen.

**POSTEMERGENCE:** For maximum activity, weeds should be growing vigorously at the time of application. Increased contact activity on established weeds may be obtained by the addition of a non-ionic surfactant of at least 80% active ingredient at 0.25 to 0.50% (v/v).
