goes through clothes.)

USE ONLY WHEN WEARING THE **FOLLOWING PROTECTIVE** EQUIPMENT AND CLOTHING

(1) Wear water-proof pants, coat, hat, rubber boots or rubber overshoes. (2) Wear safety goggles. (3) Wear mask or respirator approved by the U.S. Bureau of Mines for methyl parathion protection. (4) Wear heavy duty, natural rubber

WORK SAFETY RULES

Keep all unprotected persons and children away from treated area or where there is danger of

Do not rub eyes or mouth with hands. If you feel sick in any way, STOP work and get help right away. Call a doctor (physician), clinic or hospital - immediately. Explain that the victim has been exposed to methyl parathion and describe his condition. After first aid is given (see First Aid Treatment Section) and if a doctor cannot come, take victim to clinic or hospital.

IMPORTANT! Before removing gloves, wash them with soap and water. Always wash hands, face and arms with soap and water before smoking, eating or drinking.

AFTER WORK, take off all work clothes and shoes. Shower, using soap and water. Wear only clean clothes when leaving job. Do not wear contaminated clothing. Wash protective clothing and protective equipment with soap and water after each use. Respirator should be cleaned and filter replaced according to instructions included with respirator.

POISON SIGNS (Symptoms)

METHYL PARATHION is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: Headache, nausea, vomiting, cramps, weakness, blurred vision, pin-point pupils, tightness in chest, labored breathing, nervousness, sweating, watering of eyes, drooling or frothing of mouth and nose, muscle spasms and coma.

FIRST AID TREATMENT

Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to methyl parathion and describe his con-

If breathing has stopped, start artificial respiration immediately and maintain until doctor sees

If swallowed and victim is awake (conscious) make him vomit quickly. Induce vomiting by sticking finger down throat or by giving soapy or strong salty water to drink. Repeat until vomit is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet. See doctor immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. See doctor immediately.

POISON SIGNS (Symptoms)

METHYL PARATHION is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: Headache, nausea, vomiting, cramps, weakness, blurred vision, pin-point pupils, tightness in chest, labored breathing, nervousness, sweating, watering of eyes, drooling or frothing of mouth and nose, muscle spasms and come.

FIRST AID TREATMENT

Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to methyl parathion and describe his condition.

If breathing has stepped, start artificial respiration immediately and maintain until doctor sees victim.

M swallowed and victim is awake (conscious) make him vomit quickly. Induce vomiting by sticking finger down throat or by giving soapy or strong salty water to drink. Repeat until vomit is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet. See doctor immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. See doctor immediately.

NOTE TO PHYSICIAN

Since any symptoms from absorption of this combination product are likely to be those of methyl parathion intoxication, treatment should be directed towards the relief of cholinesterase inhibition.

Antidete-administer atropine sulfate in large doses, TWO to FOUR mg. intravenously or intramuscularly as soon as cyanosis is overcome. Repeat at 5 to 10 minute intervals until signs of atropinization appear. 2-PAM chloride is also antidotal and may be administered in conjunction with atropine. Methyl Parathion and Toxaphene produce central nervous system excitation which ordinarily responds to the barbituric acid derivatives; but this drug should be considered only if complete atropinization fails to relieve symptoms. DO NOT GIVE MORPHINE OR TRANQUILIZERS. Methyl parathion is a strong cholinesterase inhibitor affecting the central and peripheral nervous systems and producing cardiac and respiratory depression. At first sign of pulmonary edema, the patient should be given supplemental oxygen and treated symptomatically. Continued absorption of the poison may occur and fatal relapses have been reported after initial improvement; VERY CLOSE SUPERVISION OF THE PA-TIENT IS INDICATED FOR AT LEAST 48 HOURS.

For Emergency Assistance Call 716 – 735-3765

POST TREATED AREA

Consult your State Agricultural Extension Service or Experiment Station regarding posting treated areas.

CONTAINER DISPOSAL

See accompanying product information label.

CROP USE DIRECTIONS

Use only according to accompanying label instructions.

Printed in U.S.A.

USAGE CAUTIONS

This product is toxic to fish, birds and other wildlife. Keep out of any body of water. Do not contaminate water by cleaning of equipment or disposal of wastes. Birds feeding in treated areas may be killed. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DISPOSAL

Do not re-use empty 2 and 5 gallon containers. Destroy them by perforating or crushing. Return drum to reconditioner or destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

DO NOT CONTAMINATE FEED OR FOODSTUFFS DO NOT USE IN UNDILUTED FORM DO NOT STORE BELOW 20° F.

DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME. KEEP CONTAINER CLOSED. LEAKING PACKAGES SHOULD BE REMOVED TO A SAFE PLACE.

DO NOT APPLY WHEN WEATHER CONDITIONS FAVOR DRIFT FROM THE AREAS TREATED. DO NOT APPLY WHEN RUN-OFF IS LIKELY TO OCCUR DO NOT USE IN A MANNER OR AT A TIME OTHER THAN IN ACCORDANCE WITH LABEL DIRECTIONS BECAUSE ANIMAL, PLANT OR CROP INJURY, ILLEGAL RESIDUES OR OTHER UNDESIRABLE RESULTS MAY OCCUR.

Dealers Should Sell In Original Packages Only.
TERMS OF SALE OR USE: On purchase or use of this product buyer and user agree to the following conditions:

WARRANTY: Ningara warrants that this product, as of the time of sale by Ningara, (1) conforms to the ingredient statement on the label, and (2) is reasonably fit for the purposes set forth in the Directions for Use. EXCEPT AS SO "VATRANTYD THE PRODUCT IS SO'.D AS IS. NIAGARA MAKES NO OTHER WAFRANTY EXPRESS OF IMPLIED.

DAMAGES: buyers or user's excusive remony for damages for breach of warranty or angligence shall be limited to direct damages not exceeding the twerchase price paid and shall not include incidental or consequential damages. Notice of any claim must be reported to Niegara within 10 days of discovery by buyer or user, falling which buyer or user waives any claim for such damage. EXCUSE FROM NON-CONTROLLABLE CONDITIONS: Because of certain critical conditions created or incurred by buyer or user or over which Niegara has no control, buyer and reserve by buyer or user or over which Niegara has no control, buyer and reserve a condition of purchase or use, assume responsibility for and refers Niegara from, "labil" arising out of the handling or use of the product; thri" utable to such course. No person is authorized to vary or waive any scatement; contained be.e.a.

DIRECTIONS FOR USE

NOT FOR USE OR STORAGE IN OR AROUND THE HOME

This product is an emulsifiable concentrate that mixes readily with water for use in the control of certain insects attacking cotton and soybeans.

For ground application equipment, mix the recommended amount in sufficient water to give good coverage. When applying this material by aircraft, mix the recommended amount with sufficient water to provide a minimum of one gallon of finished spray per acre.

COTTON: For early season control of Aphids, Thrips and Fleahoppers — Use 1 quart per acre. For mid and late season control of Boll Weevil, Bollworm, Thrips, Aphids, Fleahoppers, Lygus and other Plant Bugs and Leafworm — Use 1½ to 2 quarts per acre. Do not apply within 7 days of hand picking or harvesting. Workers entering fields within 24 hours of application should wear protective clothing. Cotton which has received applications of this insecticide
