

POOL ALGAECIDE 10

Active ingredient	
poly[isobutylene, isobutylene, ethylene, acrylonitrile, ethylene dichloride]	10.0%
Inert ingredient	10%

APPLICATION

Pool Algaecide 10 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleared prior to using Pool Algaecide 10.

For pools having just visible algae growth, add an initial dose of 75 to 115 fl. oz. of Pool Algaecide 10 per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 41 to 75 fl. oz. of Pool Algaecide 10 per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fl. oz. of Pool Algaecide 10 per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of Pool Algaecide 10 throughout the water in the pool is necessary for maximum effectiveness.

Pool Algaecide 10 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Pool Algaecide 10 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Pool Algaecide 10 with concentrated dry or liquid chlorine products.

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention.

Avoid contamination of food.

Rinse empty container thoroughly with water and discard container. Do not reuse empty container or drum. Destroy it by perforating or crushing. Buy or discard in a safe place away from water supplies. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, rivers, or public water. Apply this product only as specified on this label.
