BULB SAVER DIRECTIONS

HOW TO USE: On Tulips, Balltoons, and other varieties of Bulbs, just before planting, treat the bulbs with whatever will stick to them. Plant immediately and after covering the bulbs with several inches of soil, sprinkle the soil with NOTT'S BULB SAVER. After bulb plants first set ground, evenly over the soil a second coating of NOTT'S BULB SAVER and repeat monthly.

NOTT'S BULB SAVER is largely water-soluble and will get into the soil to a depth of three feet without being washed away by rain or irrigation.

CAUTION: Avoid contact with the mouth, eyes and nose, with open skin and clothing. May be absorbed through the skin. In case of contact with skin, wash with soap and water. Wash eyes with plenty of water for at least 15 minutes. In case of contact with the mouth, swallow water. Store out of the reach of children. For domestic use only. Avoid contamination of feed and feedstuffs. May be harmful to fish.
