PLANT TYPE		RECOMMENDATIONS
BEDDING PLANTS		<p>Dry Soil Mix:</p> <p>To mix with potting, greenhouse or other transplanting soils, add Terrazole 5G at the rate of 10 ozs. per cubic yard of soil and mix thoroughly. Soil to be mixed should be free of large lumps and dry enough to prevent agglomeration during mixing. Where <i>Rhizoctonia</i> control is desired, add recommended quantities of Terraclor. Retreat as needed for continued control with soil drench applications of Terrazole 35% Wettable Powder or Terrazole 25% Emulsifiable.</p> <p>NOTE: Overdosage may result in phytotoxicity. If plants are suspected of being sensitive treat only a few plants and observe for 4 to 5 days prior to treating the entire planting.</p> <p style="text-align: right;">BEST AVAILABLE COPY</p>
