

Hill Manufacturing Company, Inc.  
1500 Jonesboro Road SE.  
Atlanta, GA 30315

Attention: John P. Glisson

Gentlemen:

Subject: HILCO #88  
EPA Registration No. 402-65

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable subject to the comments listed below. Five (5) copies of the finished labeling must be submitted.

1. Move the Statement of Practical Treatment heading over the statements.
2. Add "If swallowed, drink large quantities of water."
3. Add the "Precautionary Statements: Hazards to Humans and Domestic Animals" headings. *Also add "Danger" after these headings.*
4. Either increase the amount of Hilco 88 or decrease the amount of water so that 200 ppm is the maximum available chlorine for methods of sanitization.

Sincerely yours,

  
Jeff Kempter  
Product Manager (32)  
Antimicrobial Program Branch  
Registration Division (H7505C)

PROVEN SOLUTIONS TO MAINTENANCE PROBLEMS

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product inconsistent with its labeling.

All equipment should be thoroughly cleaned and rinsed daily processing. Sanitize equipment shortly before used or at a time specified by local regulations.

## USING HILCO 88 IN THE FOOD PLANT FOR SANITIZING EQUIPMENT

FLUSH OR RINSE METHOD - 1. Dissolve 1 1/2 ounces of Hilco 88 in each 3 1/2 gallons of water required which provides approximately 100ppm. available chlorine. Enough water should be prepared so as to require 5 minutes for it to flow or be pumped through the equipment.

2. Pump or allow the Hilco 88 solution to flow through the equipment. It is important that all surfaces of the equipment which are later in contact with the milk be reached by the 88 solution. Brush the covers and upper surfaces of the tanks.

3. Solution should be tested during use to make sure concentration does not drop below 50 ppm available chlorine. If facilities for testing are not available, use a solution of 200 ppm. available chlorine or 3 ounces to each 3 1/2 gallons of water.

SPRAY METHOD - The spray method is recommended for sanitizing large tanks, open surface coolers and similar equipment.

1. Dissolve 4 ounces of Hilco 88 in each 4 gallons of water.
