

[421-82]

400

ACTIVE INGREDIENTS 100%

- 1. Permethrin Distillate
  - 2. Technical Piperonyl Butoxide
  - 3. Pyrethrins I and II
- Equivalent to Butyltinyl Di-Propylpiperonyl ether and related compounds

ACCEPTED  
 1.3.17 1972  
 FEDERAL INSECTICIDE ACT

FOLLOW DIRECTIONS CAREFULLY FOR BEST RESULTS

**FLIES, MOSQUITOES, GNATS:** infested area should be closed tightly and filled with a mist of this insecticide. The space should be left closed for a least 10 minutes after treatment. Do not remain in treated areas. Ventilate the area after treatment is completed. Squeeze and destroy dead insects. Remove pets, birds and cover fish aquariums before spraying.

**SPIDERS:** Spray directly on spiders wherever they are seen. Direct the spray into infested areas such as baseboards, corners of rooms, around pipes and storage localities. Repeat when necessary.

**ANTS:** To control these insects, apply the solution to surface where they are crawling. Pay particular attention to door sills and window frames, repeating application as necessary.

**CLOTHES MOTHS:** Clothing to be stored should be cleaned and aired, and sprayed thoroughly from a distance of one (1) to two (2) feet with special attention to seams and folds. Moth-tight chests and vaults should be sprayed thoroughly before being filled with materials being stored. If clothes are not stored in moth tight containers, spray thoroughly every 30 days.

**BEDBUGS:** This Formula is well adapted to the control of these pests. Spray solution on baseboards, moldings, furniture, loose wall-paper and other points where there are cracks for the bugs to hide and breed. Spray bed frames, springs, and mattresses thoroughly.

**FLEAS INFESTING PREMISES** can be controlled and effectively by spraying through cracks of the infested areas. Fleas lurk in carpets and upholstered furniture. Spray liberally in these areas, as well as in baseboards, wall cracks and sleeping quarters of animals for direct contact with these pests.

It is frequently desirable to replace animal bedding after treatment.

**CAUTION:** Do not spray animal pets.

**COCKROACHES, WATERBUGS, SILVERFISH:** Spray the infested area thoroughly with this spray into cracks and other hiding places. Wherever possible try to hit the insects directly with the spray. This application should be repeated as often as necessary.

**POULTRY RED MITES:** Around poultry houses and hatcheries, direct a heavy wet spray into all cracks and crevices and on floors, walls, roosts, nests, and coops. Repeat treatment when observations indicate the need.

EPA REGISTRATION NO. 421-82

NET CONTENTS

CAUTION: KEEP OUT OF REACH OF CHILDREN.

HARMFUL IF SWALLOWED. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

**FOR USE IN FOOD PROCESSING PLANTS:** Food should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Do not reuse empty container. Destroy it by perforating or crushing. Purge or discard in a safe place away from water supplies.
