

USE DIRECTIONS

NELLITE WS is a systemic insecticide for control of root-knot nematodes in the early season in tobacco. It is not a fungicide. Use on tobacco. Make the treatment when plants are transplanted to the field. Use 1 gallon of NELLITE WS per acre of tobacco. The transplanted water to be applied to the tobacco plants. **Note:** Depending on the number of transplanted barrels of tobacco water to be used per acre, measure out the proper amount of NELLITE WS per container used. See the back of this label for details.
