DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Remove protective cap from valve. Hold can upright and aim long red nozzle away from you and directly at areas to be treated. Hold container 6" to 18" away and wet surfaces at the rate of 1 to 2 ft. per second. Leave treated surfaces wet.

ROACHES: Treat all areas where insects are commonly found, behind baseboards, mouldings, furniture, shelves, sinks and pipes. Direct nozzle into cracks and similar hiding places.

This thorough application is effective for weeks. The residual coating left by this treatment is not easily swept away. However, cleaning with soap and water will remove the application, so reapply after such cleaning.

SILVERFISH, SPIDERS, CRICKETS, WATERBUGS: Spray directly on insects where possible. Treat all areas where insects are commonly found. Direct nozzle into cracks, crevices and similar hiding places.

ANTS: Direct nozzle on ant trails and wet around door sills and window sills and window frames, openings around water pipes, heat ducts and baseboards.

Storage: Store in a cool, dry place (preferably locked) inaccessible to children and pets. **Disposal:** Replace cap, wrap and put in trash collection.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Do not spray on humans, animals, food or food utensils. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing vapors. Avoid contact with skin, eyes and clothing. Before spraying, remove fish bowls, bird cages and pets. Do not smoke while using this product.

Statement of Practical Treatment

If Swallowed: Contact a physician or poison control center immediately. Do not induce vomiting. **If Inhaled:** Remove person to fresh air. Apply artificial respiration if indicated. Contact a physician if warranted. **If On Skin:** Remove affected clothing and immediately wash skin with water. Contact a physician if irritation persists. Wash clothing prior to reuse. **If In Eyes:** Immediately flush with plenty of water. Contact a physician if irritation persists.

Physical or Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not spray on plastics or asphalt tile, or anything that may be affected by petroleum distillates. Do not use this product in or on electrical equipment due to the possibility of shock hazard.
