

TAT TE WASP & HORNET SPRAY

Kills on Contact Hornets, Wasps and Yellowjackets

For Use Both Indoors and Outdoors for Controlling Hornet, Wasp and Yellowjacket Nests

Gives Rapid Contact Kill and Residual Kill of Insects Returning to the Treated Nest

Gives Rapid Knockdown and Kill of Hornets, Wasps and Yellowjackets

Reaches Nests [15] 20 Feet Above Ground

Electrically Non-Conducting Formula

Dielectric Breakdown Voltage: 40.6 kV by ASTM Test Method D-877-87

Also Controls Ants and Spiders

GUARANTEED!

See Details on Back

ACTIVE INGREDIENTS:

Tetramethrin (CAS Number 7696-12-0)	0.200%
Esfenvalerate (CAS Number 66230-04-4)	0.031%
OTHER INGREDIENTS*	99.769%
Total	100.000%

*Contains petroleum distillate

Keep Out of Reach of Children
CAUTION
 See back panel for additional
 precautionary statements.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[Storage and Disposal]

Storage: Store in a cool dry (preferably locked) storage area inaccessible to children and pets and away from heat or open flame.
Disposal: Replace cap, wrap container and put in trash. Do not incinerate or puncture. [Alternate Disposal Directions: **Disposal:** This container may be recycled in aerosol recycling centers. Before offering for recycling, empty the can by using the product according to the label (**Do not puncture!**). If recycling is not available, replace cap, wrap the container and put in trash.]

This product may be used both indoors (attics and other places where nests are built and where food or feed are not exposed) and outdoors on hornet, wasp and yellowjacket nests.

To kill hornets, wasps and yellowjackets: Apply this product in the early morning or late evening when air temperature is cooler, most insects are in the nest and little activity is observed around the nest opening. Spray only if it is not windy. Stand a safe distance from the nest, not directly beneath it. Hold container upright at arm's length, point the actuator at nest and spray the opening of the nest. Then saturate the nest with spray. Treated insects will fall out of the nest and die. Any insects returning to the treated nest will also be killed. Do not attempt to spray insects while in flight. Wait 48 hours before removing the nest. Hose off with water any foliage of desirable plants contacted during spraying.

For the control of ants and spiders (only outdoors): For ants and spiders found in areas such as electric service boxes, water meter boxes, telephone boxes, along house foundation, foundation vents, sills and ledges, etc., spray in short bursts to contact pests. Ant trails, runways and hills should also be sprayed as necessary. Do not spray foliage of desirable plants. If spray does contact foliage, hose off with water.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Do not use in commercial food processing, preparation, food storage or serving areas. In the home, cover all food processing surfaces and utensils during treatment or thoroughly wash before use. Cover or remove exposed food. When using indoors, remove pets and birds and cover fish aquariums before spraying.

First Aid

If Swallowed	<ul style="list-style-type: none"> • Immediately call a poison control center or doctor for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If on Skin or Clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Immediately rinse skin with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-888-740-8712 (the international poison center) for emergency medical treatment information.	
Note to Physician: Contains petroleum distillate. Vomiting may cause aspiration hazard.	

Physical or Chemical Hazards

Flammable. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Incineration of container may cause explosion.

Environmental Hazards

This product is toxic to fish and other aquatic invertebrates. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.
