crabgrass preventer plus lawn fertilizer

with dandelion control

For established lawns only.
Do not use if planting grass seed.

Prevents germination of the following weeds:

batyardgrass	foxtail	carpetweed
browntop	goosegrass	chickweed, common
panicum	lovegrass	Florida pusley
crabgrass	witchgrass	(Mexican clover)

lambquarter
nodding spurge
pigweed,
redroot
purslane

Controls the following weeds when they are actively growing:

bittercress	cudweed	galinsoga	mustard	ragweed
black medic	daisy fleabane	ground ivy	pennywort	shepherd's
buckhorn	dandelion	heat-all	pepperweed	purse
burclover	English daisy	henbit	pigweed	smartweed
buttonweed	evening	knotweed	plantain	stitchwort
chickweed	primrose	(seedling)	prickly lettuce	thyme-leaved
chicory	fitaree	lambquarter	puncturevine	sandwort
cinqfoil	fog fruit	moneywort	purslane	yellow-rocket
clover (white)	(Lippia)	morning glory		

How To Use

- DO** apply in spring between second and sixth mowing, before most dandelions are in the puff ball stage and before crabgrass germinates in the spring.
- DO** apply only when lawn is wet from dew, rain or thorough watering (very important so that the particles will stick to the weed leaves instead of falling to the soil).
- DO** withhold watering lawn for at least 24 hours *after* application (to avoid washing particles off the weed leaves).
- DO** apply on a calm day.
- DO** apply at Scotts Spreader (Standard or Automatic Models) setting **7 1/2**.
- DO** slightly overlap spreader wheel tracks for complete coverage.
- DON'T** use on lawns of bentgrass, carpetgrass, improved varieties of Bermuda, St. Augustinegrass or dichondra.
- DON'T** apply on newly seeded or sodded areas until the grass has received its fourth mowing.
- DON'T** seed or sod for 4 growing months after application.
- DON'T** apply to shrubs, flowers, fruit and vegetable plants.
- DON'T** make application at less than four month intervals.
- DON'T** rake or aerify *after* application, to avoid disturbing the Halts Plus barrier in the soil.
- DON'T** use this product to control crabgrass or other wild grasses already up and growing.
- DON'T** expect control of dandelions overnight. A month of good growing weather may be required for complete control.
