

### HOW TO USE PURINA HOME SPRAY

Purina Home Spray will kill flies, mosquitoes, gnats, moths, spiders, ants, silverfish, fleas, carpet beetles, bedbugs, and many other insects.

**For Flies and Mosquitoes.** To kill flying insects such as flies, gnats, and mosquitoes, close the room, then spray liberally toward the ceiling with a fine mist. Leave the room closed for 15 minutes. Do not remain in treated areas. Ventilate the area after treatment is completed. Sweep up and destroy fallen flies.

**For Moths.** Hold nozzle of spray about 2 feet from garment, spraying thoroughly inside and out to the point of dampness. Thoroughly spray container in which clothing is to be stored. Store in moth-tight container.

**For Spiders, Ants, and Silverfish.** Whenever possible, spray directly on the insects. Spray liberally or brush into cracks, along baseboards, in corners, around water pipes, runways, or wherever insects hide. Repeat as necessary.

**For Fleas and Carpet Beetles.** Spray over the floors, on and under carpets and rugs, also on and to the interior of furniture that may be infested. Repeat treatment until insects are controlled. Respray when necessary.

**For Bedbugs.** Take beds apart and spray heavily into all hiding places in bedsteads, on mattresses and into cracks in walls and along the baseboards. Repeat treatment when necessary.

**CAUTION:** When applying spray, do not smoke or use near open flame. Harmful if swallowed. Remove fish bowls, birds and other pets before spraying. Avoid inhalation. Avoid contamination of feed and foodstuffs. Avoid contact with skin. Wash with soap and water after using. Wash spray residue off plastic surfaces and asphalt tile.

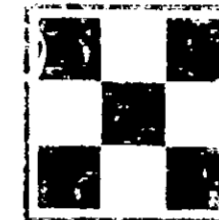

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.
