

# A PRENTISS PEST-TESTED PRODUCT

CO-RAX REDI-USE MOUSE & RAT BAIT

FOR THE CONTROL OF MOSES AND OTHER RODENTS

## ACTIVE INGREDIENT

Warfarin Sodium, 0.05% (w/w) as the active ingredient in the bait.

## INERT INGREDIENT

**CAUTION**  
CO-RAX REDI-USE MOUSE & RAT BAIT  
contains as its active ingredient a  
anti-coagulant chemical, therefore,  
baits prepared with CO-RAX REDI-USE  
MOUSE & RAT BAIT must be protected  
from or placed where humans, live  
stock, wildlife, poultry or pets will  
not eat them. If accidentally eaten,  
give a tablespoon of salt in a glass of  
warm water and repeat until vomit fluid  
is clear. Call a Physician immediately.  
**NOTE FOR PHYSICIANS:** When a human has  
been known to have ingested my CO-RAX  
REDI-USE MOUSE & RAT BAIT, blood trans-  
fusions combined with intravenous infusions  
and oral doses of vitamin K  
are indicated. If no signs of  
coagulation are present in the  
blood, transfusions should be  
continued.

## KEEP DRY

**CAU**

**TOTAL**  
CONTENTS: Bait contains 100% Warfarin Sodium, 0.05% (w/w).  
The bait is made from a highly palatable  
concentrated bait base which is a mixture  
of cereal grains, salt, oil, protein, vitamins  
and minerals. It is a dry, granular product.  
An interrupted supply of bait should be maintained.  
MICE & RODENTS will take up to one week to learn  
that the amount of bait offered is too little to satisfy  
them. Therefore, bait should be distributed at intervals  
be placed at 6-12 ft. intervals. An uninterrupted supply of bait  
should be maintained for at least 10 days.  
Each particle of the Warfarin bait that has been ingested is a  
material that results in the death of a rodent. If the rodent  
that eats the bait is deceased, the rodent may die in greater or less time  
depending on the size of the rodent and the acceptability of the bait.  
Unated bait is soluble in water and can be washed off the hands  
or clothing with minimal difficulty. However, if the bait  
is ingested, it is recommended that you do not wash  
the area of the mouth with water, as this may  
cause the bait to dissolve and increase the amount  
of bait ingested. Instead, drink a large amount  
of water to dilute the bait and flush it through  
the system. If you have any questions concerning  
the use of CO-RAX REDI-USE MOUSE & RAT BAIT  
please call our toll-free number 1-800-222-1234.
