SOIL FUNGICIDE

# 40% DUST

<b>ACTIVE INGREDIENT:</b>	
Pentachloronitrobenzene	40%
<b>INERT INGREDIENTS:</b>	60%
<b>Total</b>	<b>100%</b>

## DIRECTIONS FOR USE

### CAUTION KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Irritant to eyes, nose, throat. Do not get on face, neck, chest, or body. Causes skin irritation. Wash thoroughly with soap and water. In case of eye contact, flush with plenty of water. Wash thoroughly if on skin. Wear gloves when handling. Do not use in enclosed areas. Do not use in areas where food is prepared or stored. Do not use on food stuffs.

**USE CAUTIONS**  
This product is toxic to fish. Keep out of any body of water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not plant any root crop not registered for PCNB in rotation on PCNB treated soil. Dispose of empty bags by burning (KEEP OUT OF SMOKE)

### NOTICE TO BUYER

This product is a registered pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act. It is sold under the name Terraclor 40% Dust. It is a soil fungicide. It is used to control soil-borne fungi. It is used on peanuts, tomatoes, and peppers. It is used in surface band treatments, pre-plant soil mixes, and soil mixes during cultivation. It is used at a rate of 25 lbs. per acre for surface band treatments, 25 lbs. per 12,500 linear feet of row for pre-plant soil mixes, and 8 lbs. per 12,500 linear feet of row for soil mixes during cultivation. It is used in split applications during three cultivations. It is used on flat tomatoes, staked tomatoes, and open V-trenches. It is used at a rate of 18 lbs. per 7,300 linear feet for flat tomatoes, 14 lbs. per 10,900 linear feet for staked tomatoes, and 14 lbs. per 14,500 linear feet of row for open V-trenches. It is used in trench dust applications. It is used on tomatoes and peppers. It is used to control Southern Stem and Root Rot (Sclerotium rolfsii) and Southern Blight (Sclerotium rolfsii).

### PEANUTS (Southern Stem and Root Rot — Sclerotium rolfsii):

**Surface Band Treatment:** Apply 25 lbs. per acre (per 12,500 linear feet of row) in a 12 inch band centered on the row, at pegging time. Where cultural practices permit, this may be mixed and applied simultaneously with land-plaster.

**Pre-plant soil mix:** Apply 25 lbs. per 12,500 linear feet of row in an 8 to 12 inch band centered on the row and mix to a depth of 2 to 4 inches. Application may be made simultaneous with planting, using suitable application equipment.

**Soil Mix During Cultivation:** Apply in split applications during three cultivations at the rate of 8 lbs. per 12,500 linear feet of row per application. Attach two delivery tubes per row ahead of inside cultivator sweeps (one on each side) and adjust so as to treat a band of 12 inches wide centered on the row. Do not pile untreated soil on crown of plant.

**NOTE:** Do not feed treated vines to livestock. Do not allow hogging down of treated peanuts.

### TOMATOES AND PEPPERS (Southern Blight — Sclerotium rolfsii):

**Trench Dust:** Dust 18 pounds per 7,300 linear feet for flat tomatoes, or 14 lbs. per 10,900 linear feet for staked tomatoes, and for 14,500 linear feet of row for peppers, over open "V" trench just before setting transplants. Set plants in bottom of trench, then press walls of trench against stems of young transplants. Note: When cultivating, not power as that a good practice is to get rid of old plants in terms of plant.

### PEANUTS (Southern Stem and Root Rot - Sclerotium rolfsii)

**Surface Band Treatment:** Apply 25 lbs. per acre (per 12,500 linear feet of row) in a 12 inch band centered on the row at pegging time. Where cultural practices permit, this may be mixed and applied simultaneously with band-plaster.

**Pre-plant soil mix:** Apply 25 lbs. per 12,500 linear feet of row in a 12 inch band centered on the row in a 2 to 4 inch depth. Application may be made simultaneously with planting, using the appropriate equipment.

**Soil Mix During Cultivation:** Apply 25 lbs. per 12,500 linear feet of row in a 12 inch band centered on the row in a 2 to 4 inch depth. Apply during the first or second cultivation. Application may be made simultaneously with planting, using the appropriate equipment.

### NOTE: For use in the following States:

Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin.

Trench Dose: 10 lbs. per 12,500 linear feet of row.

Use only in accordance with the directions on the label. Do not apply to any body of water. Do not use in conjunction with equipment which discharges water. For PCNB in 40% D.S.F. formulation, use 100% PCNB KE.
