

DIRECTIONS:

Control in and around apartment buildings, dorms, stores, and warehouses. Indoors: For fleas, crickets, silverfish, ticks and ants:

1 part of BAN/SI in 3 quarts (3 to 1 dilution) of water and apply as a residual spray to window frames, the underside of drawers, under sinks and stoves and to places where insects may crawl when they are not active. For ants on porches and places where they are not active, repeat as necessary. Do not spray on food or food containers.

DIRECTIONS (Continued)

Do not use in eating, smoking areas or in areas where children or other animals may play. New products of this type should be applied to the exterior of buildings, trees, shrubs, fence posts and other structures which are not painted or covered with vinyl. Do not paint or cover treated surfaces with vinyl.
