-DIRECTIONS-

CIEDRIN (R) 2% Insecticide Solution is a specially prepared ready-to-use insecticide suitable for use in conventional hand, power, or automatic spray equipment. Also, suitable for back-rubbers.

DAILY CATTLE AND BEEF CATTLE: For House Flies, Horn Flies, Stable Flies, and Face Flies, apply CIEDRIN (R) 2% Insecticide Solution as a fine mist. (Do not apply in excess of two fluid ounces per animal per day.) Spray to thoroughly cover all parts of the animal, including legs for Stable Flies and the face and forehead for Face Flies. Where a complete fly control program is practiced with premise sprays, etc., two to three applications per animal each week will give control.

BACK RUBBERS: For control of Horn Flies mix one gallon of 2% Ciedrin Insecticide with one gallon of fuel oil or kerosene. Using the diluted mixture fill the reservoir or saturate cable at the rate of 2 to 4 quarts per 20 feet of cable. Repeat every two weeks or as needed for fly control. Back Rubbers should be located where animals usually congregate. For Face Flies use a 200. BACKRUB so constructed that one end is low enough for cattle to treat themselves. Only the cattle receiving this treatment will be protected.

-PRECAUTIONS IN USE-

CAUTION: AVOID PROLONGED OR REPEATED inhalation of mist and contact with skin. In case of contact with skin or eyes, flush with plenty of water, for eyes get medical attention. Keep away from open flame. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, water, or feedstuffs. Keep out of reach of children. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal.

NON-RESPONSIBILITY: Seller makes no warranty expressed or implied, regarding this product except the composition as set forth in the ingredient statement herein. Buyer and user assume all risk of possession, handling or use whether or not in accordance with any directions contained herein.
