

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
(AND DOMESTIC ANIMALS)
CAUTION

Harmful if swallowed.
 Avoid inhalation, spray mist.
 Irritating to skin and eyes.
 Do not get in the eyes.
 Avoid skin contact.
 Wash thoroughly with soap and water after using.
 Avoid contact with skin, clothing, utensils, food ingredients, feed and water equipment.
 Do not use in areas where food processing plants are used.

Do not use on surfaces or dairy barns.
 Do not spray directly on feed, foodstuffs or raw ingredients.
 Do not spray directly on persons, domestic livestock, especially dairy animals.
 Use a pesticide residue or purity approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute of Occupational Safety and Health under the provisions of OSHA 30 CFR.

ENVIRONMENTAL HAZARDS

Remove all birds and other domestic pets from room during spraying and keep children from spray as dry.
 This product is toxic to fish. Do not spray directly in water. Do not contaminate water by rinsing of equipment or disposal of wastes. Apply this product only as specified on this label.

NON-WARRANTY

Seller makes no warranty expressed or implied concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and/or handling is contrary to safe instructions.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

- 1. FRESH BULK: Store in clean, dry, rodent-free storage and dispose.
- 2. PESTICIDE DRUMS: See disposal of excess pesticide or pesticide wastes section above. If these wastes cannot be disposed of by use according to above instructions, contact your state pesticide or environmental control agency or the hazardous waste representative at the nearest EPA regional office for guidance.
- 3. CONTAINERS: See disposal of containers section above.
- 4. DENFAA: Contact state or local fire and rescue authorities for approved procedures other than those given above. Approved procedures vary widely by jurisdiction and type of generator.
- 5. EQUIVALENT METHOD TO TRIPLE RINSING: Empty drums as completely as possible. Remove the bungs and place drums into an area until liquid has evaporated.

MAX KILL.

Mill & Bin Spray

**Ready To Use - Long Lasting
Quick Knockdown**

KILLS EXPOSED STAGES OF:
 Granary Weevil, Cadelle, Confused Flour Beetle, Saw-Toothed Grain Beetle, Angoumois Grain Moth, Indian Meal Moth, Lesser Grain Borer, Roaches, Flies, Black Carpet Beetles & Meal Worms

ACTIVE INGREDIENTS:
 Technical Methoxychlor* 3.0%
 Pyrethrins 0.25%
 Technical Piperonyl Butoxide** 0.003%

INERT INGREDIENTS:
 Aromatic Petroleum Derivative Solvent 20.0%
 Petroleum Distillate 70.812%

*Equivalent to 1% of 1, 1, 1-trichloro-2, 2-bis-(methylphenoxy) ethane and 0.36% of other isomers and related compounds.

**Equivalent to 0.06% of (E)-2-carboxy-3-propyl(piperonyl) ether and 0.013% of related compounds.

KEEP OUT OF THE REACH OF CHILDREN CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: DO NOT INDUCE VOMITING. Call medical aid. Aspiration of product into lungs due to vomiting can cause chemical pneumonitis which can be fatal. Emergency medical personnel should remove poison by gastric lavage.

IF BREATHED: If inhaled in heavy concentrations or if illness results, remove to fresh air, and get medical attention. Administer artificial respiration, oxygen, or cardiopulmonary resuscitation if needed.

IF ON SKIN: Remove contaminated clothing. Wash with mild soap and water. Launder contaminated clothing. If irritation occurs seek medical aid.

IF IN EYES: Flush with large amounts of water for at least 15 minutes. If irritation persists, seek medical attention.

See side panel for presentationary statements.

DIRECTIONS FOR USE

MAX KILL® MILL & BIN SPRAY is a ready to use combination long lasting insecticide that is best applied through conventional tank type pressure sprayers.

AS A CLEAN UP SPRAY in food processing plants, warehouses, mills and elevators apply as a coarse, wet spray to surfaces and areas where insects are known to be harboring. Avoid the contamination of equipment. After application allow for complete drying in areas where bagged feed or foodstuffs might be stored. It may be used as a clean up spray in bin bottoms after they have been thoroughly cleaned and before any grain is put back into the bin. One gallon should cover approximately 750 square feet.

AS A PROTECTANT in empty box cars, trucks and shipholds apply as a coarse wetting spray to all exposed surfaces. Allow for complete drying before any commodity loading.

AS A BIN SPRAY in farm granaries thoroughly clean and remove all dust and debris before applying a coarse, wetting spray to all exposed surfaces. Here again complete drying is necessary before any commodities are placed into the bin. Do not spray directly on grain and do not contaminate any feed or food stuffs. One gallon should cover approximately 750 square feet on non-absorbant surfaces.

AS A FOG in edible product areas of food processing plants, elevator galleries and tunnels apply through a mechanical type fogger or master at a rate of one quart per 5,000 cubic feet. Do not apply while equipment is in operation, and allow for complete settling of the fog or mist before any grain is conveyed. This method is quite satisfactory for the control of the adult stages of Indian Meal Moth. Repeat as needed.

See left panel for further precautions when using.

ACCEPTED

AUG 28 1989

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under
 EPA Reg. No. 2548-28
