

# FLEA KILLING COLLAR

**\$1.98**  
PLUS TAX WHERE APPLICABLE

PRINTED IN U.S.A.

**DIRECTIONS:** Buckle collar around dog's neck loosely. Any collar, when buckled too tightly, may cause skin irritation. Attach collar so two or three fingers may be inserted easily between collar and dog's neck. Cut off any excess and dispose of it. The collar starts killing fleas as soon as it is placed around dog's neck. Fleas on the dog will be killed and new ones which may temporarily appear on the dog will also be killed during the 3 months collar is worn. Ticks are tough and are killed slowly. They will usually be dead in 1-5 days. Collar will continue to kill ticks for 8 weeks. Dead ticks may occasionally remain in the dog's coat but are easily detached. Ticks inside ears are hardest to kill—for best results remove these ticks when collar is put on. Use in addition to regular collar. When bathing dog remove collar until dog is dry. Replace collar when effectiveness diminishes.

**CAUTION:** Do not open protective pouch until ready to use. Do not allow children to play with this collar. Collar is intended for use only as an insecticide generator and is not to be taken internally by man or animals. Animals should not be allowed to chew on the collar. Do not use on cats, whippets and greyhounds. Some dogs may be sensitive to this collar. When collar is first worn, observe neck area for irritation every few days. Remove collar at first sign of irritation or adverse reaction. Do not use on sick or convalescing dogs. Do not use any other pesticide on dog while collar is worn.

ACTIVE INGREDIENTS:  
2, 2-dichlorovinyl dimethyl phosphate 8.37%  
Related compounds . . . . . 0.63%  
INERT INGREDIENTS . . . . . 91.00%  
TOTAL 100.00%
