EPA Reg. No. 7724-64

EPA Est. 7724-1X-1

ZOECON INDUSTRIES

12200 Denton Drive, Dallas, Texas 75234

* Reg. Trademark Hercules Incorporated

CONTENTS: ONE GALLON 128 FL OZ.

DIRECTIONS: For use only on dogs and cats in the house, lawn and garden. Apply to areas of infestation with 1 1/2 quarts of water (30 gal. per gallon to take a 2 1/2 gallon spray nozzle) in areas where dogs and cats frequent. Pay particular attention to places where dogs and cats sleep, including for the dog's owners. Spray lawn at the rate of 1 gallon of concentrate per 500 sq. ft. of lawn. Keep children and pets off treated areas until this material is washed into the soil and area is completely dry.

For use inside of house, treated with 1/2 quart of AS-575. Dilute 1 quart of AS-575 with 10 1/2 quarts of water and spray infested areas. AS-575 Emulsifiable Concentrate may be mixed with oil instead of water to persist, but should be separated or filtered prior to use because a small amount of water will separate out on mixing with the kerosene. Cover or remove furniture areas to be treated.

ACTION: Kills by contact and ingestion. Kills ticks, fleas and mites. Do not get concentrate on eyes, on skin or on clothing. Do not breathe vapors or spray mist. Wash thoroughly with soap and water after handling concentrate. Do not contaminate feed and food stuffs. Keep out of reach of children. Do not use drum. Return drum from manufacturer or distributor participating in recycling and buying in a safe place.

ANTIDOTE: External - wash with soap and water. Internal - call a physician immediately. Large doses of atropine are antidote for organophosphorus insecticides.

CONTENTS: ONE GALLON 128 FL OZ.

DIRECTIONS FOR USE - For Control Of Ticks and Fleas In Dog Houses, Lawns And Outdoor Areas: Dilute 1 qt. of AS-575 with 12 1/2 gals. of water (5tbls. per gal.) to make a 0.5% solution and spray infested areas. Pay particular attention to places where dogs have been sleeping or resting for the past several months. Spray lawns at the rate of 12 gallons of dilute (0.5%) solution per 4,000 sq. ft. Keep children and pets off treated area until this material is washed into the soil and area is completely dry.

For Use Inside Of Homes Infested With Ticks And Clover Mites: Dilute 1 qt. of AS-575 with 12 1/2 gals. of water and spray infested areas (AS-575 Emulsifiable Concentrate may be mixed with oil instead of water if desired, but should be decanted or filtered prior to use because a small amount of inert material will separate out on mixing with deodorized kerosene). Cover or remove aquatic in areas to be treated.

CAUTION: Not for use as flea control in the home.

WARNING: May be fatal if swallowed, inhaled or absorbed through skin. Do not get concentrate in eyes, on skin or on clothing. Do not breathe vapors or spray mist. Wash thoroughly with soap and water after handling concentrate. Do not contaminate feed and food stuffs. Keep out of reach of children. Do not reuse drum. Return to drum reconditioner or destroy by perforating or crushing, and burying in a safe place.

ANTIDOTE: External - wash with soap and water. Internal - call a physician immediately; large doses of atropine are antidotal. Give emetic of mustard.
