**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation. Causes moderate to severe eye irritation. Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation.

MILK PLANT AND DAIRY EQUIPMENT

Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation. Causes moderate to severe eye irritation. Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation.

STORAGE AND DISPOSAL

Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation. Causes moderate to severe eye irritation. Causes moderate to severe skin irritation. Causes moderate to severe respiratory tract irritation.

TE SOLUTION

SWIMMING POOLS

For maintenance of swimming pools, maintain a residual chlorine level of 1.0 ppm. The amount of chlorine to be added is determined frequently when the pool is in use. A reliable test kit for additional chlorine is available. Hypochlorite solution is as follows:

GALLONS OF WATER	SODIUM HYPOCHLORITE SOLUTION REQUIRED
500	4 teaspoon
1,000	8 teaspoon
5,000	7-8 cup
10,000	12-3 cup
25,000	4 cups
100,000	18 cups (3.6 pints) 8 oz

To control algae, use a 1% solution of sodium hypochlorite at 10 ppm. Apply after the pool has been cleaned. Apply after the pool has been cleaned until the chlorine is depleted to 1.0 ppm. Dilute the required amount of hypochlorite with at least 10 times its volume of water. The chlorine solution can then be applied to the pool from the edge with a sprayer.

MEAT AND POULTRY PROCESSING PLANTS

Use a 1% solution of sodium hypochlorite for general cleaning of meat and poultry processing plants. Apply to all surfaces, including floors, walls, and equipment. Rinse thoroughly with water after use.

WATER PURIFICATION

Use a 1% solution of sodium hypochlorite for water purification. Apply to the water source and allow to stand for 30 minutes before use.

LAUNDRY BLEACH

Use a 1% solution of sodium hypochlorite as a laundry bleach. Apply to laundry items and allow to stand for 30 minutes before washing.
