CAUTION: KEEP OUT OF REACH OF CHILDREN
(See back panel for other cautions.)

BACK PANEL

When sprayed on woolen fabrics Strobane Moth Spray will leave a non-objectionable protective deposit which kills adult moths, moth larvae and carpet beetle larvae on prolonged contact. One treatment, applied according to directions, protects woolens from these insects during a storage period of 12 months unless removed by washing or dry cleaning.

ACTIVE INGREDIENTS	
Terpene polychlorinates (65% chlorine)*.....	5.0%
Petroleum distillates.....	35.0%
INERT INGREDIENTS.....	60.0%

*STROBANE(R) (Consists of camphene, pinene and related terpene polychlorinates.)

DIRECTIONS

Remove protective cap; direct nozzle opening AWAY FROM YOU; press down valve to release spray.

Woolen articles such as suits, dresses, blankets, upholstery and rugs should be clean before treatment. Hold dispenser 18 inches from fabric. Move across surface at the rate of 1 foot per second. Each application across the fabric should be 6 inches apart to avoid waste and heavy accumulation of material. For best results, spray entire article on both sides where possible, and pay special attention to folds and seams. Properly sprayed articles should be just moist to the touch; avoid saturating. Respray if materials are washed or dry cleaned.

The contents of this dispenser will protect approximately 10 pounds of wool when properly used.

DIRECTIONS Cont'd.

SUITS, DRESSES AND COATS: An average suit weighs approximately 2.5 to 3 lbs. and can be treated with 2 minutes spraying time. Heavy suits and coats will take a proportionally longer time to treat.

BLANKETS AND UPHOLSTERY: A medium weight blanket weighs approximately 4 lbs. and can be treated with 3 minutes of spraying time or at the rate of 1/2 minute per square yard. Treat upholstery surfaces thoroughly, especially concealed areas, seams, welting, tufts and folds.

FLOOR COVERINGS: This dispenser is not intended for large-scale treatment of rugs and carpeting, but will afford excellent spot protection. Use on concealed and undisturbed areas such as under furniture and rugs, in corners and around baseboards.

CAUTION: Avoid prolonged inhalation of spray. Do not spray directly on skin of humans and pets. Do not wear clothing which is wet from spray. In case of accidental contact, wash with soap and water. Avoid contamination of foodstuffs and cooking utensils. Remove birds, pets and fish bowls from room being sprayed. Do not spray on plastic or asphalt materials. Do not store at temperatures above 120°F. or place container on radiators, stoves or where excessive temperatures may be encountered.
