

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

Mr. Paul Ladoux  
Linwood Laboratories, Inc.  
945 Great Plain Avenue  
Needham, MA 02492

FEB 27 2002

Dear Mr. Ladoux:

Subject: Amendment - Comply with 2000 Diazinon MOA; and  
Update CSF/replacement diazinon source  
Shoo-Fly Hornet Wasp Jet Bomb  
EPA Registration Number 3546-27  
Your submissions dated October 11, 2001 and  
January 15, 2002

The amendment referred to above, submitted in connection with registration under FIFRA section 3(c)(7)(a), is acceptable provided that you:

1. Submit and/or cite all data or other material required for registration/reregistration of your product under FIFRA section 3(c)(5) or FIFRA section 4 when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:
  - a. Revise the limitation "OUTDOOR USE" to read "OUTDOOR USE ONLY".
  - b. Revise the heading "Statement of Practical Treatment" to read "FIRST AID". Please note that at the next label printing (following the current one whose proofs you have submitted) this section should be updated to reflect PR Notice 2001-1.
  - c. Please note that while the Agency only stamps the master label, in this case the Shoo-Fly Hornet Wasp Jet Bomb, the revisions above should also be made to the other marketing subset labels. In addition, as we discussed by telephone, the label for the Shoo-Fly Ant & Roach subset label should also have the limitation "For Outdoor Use Only" on the front panel for consumer awareness. You may also elect to add this front panel limitation to the Shoo-Fly Screen and Surface Insect Spray subset label for the same reason.

- 3. Submit three (3) copies of your final printed labeling before you release the product for shipment.
- 4. Comply with all applicable provisions of the 2000 Memorandum of Agreement Regarding Pesticide Products Containing Diazinon (i.e., the Diazinon MOA). In accordance with the Diazinon MOA you have requested the following revisions to the conditions of registration for this diazinon product with outdoor non-agricultural (i.e., home and garden) uses:
  - a. You have requested under section 6(f) of FIFRA that this registration be voluntarily canceled on a date not later than December 31, 2004.
  - b. You may not manufacture, label, or release for shipment this product after June 30, 2003.
  - c. You may not sell or distribute this product after August 31, 2003.
  - d. The registration for this product shall expire and be canceled on December 31, 2004.
  - e. You will send to every person who directly purchases this product (i.e., to every seller) a notification of Product Recovery Program to be conducted by Syngenta and Makhteshim after December 31, 2004.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

The Basic Confidential Statement of Formula (CSF) dated January 16, 2002 which identifies a replacement diazinon source Manufacturing Use Product is acceptable and has been added to this product's registration file.

Sincerely,

George T. LaRocca  
 Product Manager 13  
 Insecticide Branch  
 Registration Division (7505C)

### RESIDUAL ACTION

One spraying of the Shoo-Fly HORNET WASP Jet-Bomb lasts 4 to 6 weeks. When used as directed this bomb leaves an invisible film that continues to kill hornets, wasps, earwigs, bees, flies, gnats, no-see-ums, ants, carpenter ants, mosquitoes, spiders and aids in the prevention of maggots in garbage pails.

### OUTDOOR USE

**HORNETS, WASPS, BEES, CARPENTER BEES, YELLOW JACKETS:** Here is a good method to control these insects when they become a menace. Look for the holes whereby they enter, or surfaces where they congregate — and spray thoroughly. Be sure to depress nozzle all the way down and move back as far as possible. Those insects hit directly by the spray will fall to the ground very shortly. Since the spray is residual, insects coming in contact with the sprayed surfaces will die soon after. Usually the treated areas are free of hornets 24 hours after spraying.

**EARWIGS, ANTS:** Hold container 12 to 18" from surface to be sprayed. Spray to the point of run-off, doorsills, windowsills, lawn furniture, clothes posts, junction between foundation and house, and other areas where earwigs and ants tend to congregate.

**SPIDERS:** Spray spiders and their immediate vicinity thoroughly.

**MAGGOTS:** To aid in keeping garbage cans free of flies and maggots, spray inside and outside frequently.

**SURFACES, SCREENS AND LIGHTS:** Apply only as a residual spray where insects alight. When used as directed this bomb leaves an invisible film that continues to kill mosquitoes, flies, hornets, wasps, spiders, ants, carpenter ants, and earwigs. Spray with wind to your back. Do not spray if wind is strong. If clothing becomes wet from spray during use, remove clothing after spraying, wash affected body areas thoroughly with soap and water and launder clothing before wearing again. Do not allow children or pets to contact treated areas until spray has dried. Do not apply to desirable plants.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes, or clothing. Avoid breathing vapor or spray mist. Do not smoke while applying this product. Wash thoroughly with soap and water after handling and before eating or smoking. May cause contact sensitization following repeated contact with skin. Avoid repeated contact with skin. If sensitization reactions result, consult a physician. Remove contaminated clothing and wash before reuse. Avoid contamination of food or feed. Do not use on household pets or humans. Remove pets from area and remove or cover fish bowls before spraying. Do not allow children or pets in treated areas until sprayed surfaces have dried.

### Statement of Practical Treatment

If swallowed: Call a physician or Poison Control Center immediately. **DO NOT INDUCE VOMITING UNLESS NO OTHER TREATMENT IS AVAILABLE.** Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting, give victim one or two glasses of water and insert finger in back of throat. Do not induce vomiting or give anything by mouth if person is unconscious or convulsing. **IF INHALED:** Remove victim to fresh air and apply artificial respiration if indicated. Get medical attention. **IF IN EYES:** rinse eyes with plenty of water and call a physician immediately. **IF ON SKIN:** Wash promptly with plenty of soap and water. Get medical attention. **Note to Physician:** This product contains an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine. This product contains petroleum distillate solvent which may present an aspiration hazard. Gastric lavage may be indicated if product was taken internally.

### DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Reformulation or repackaging of this product is prohibited. **TO OPERATE:** Remove protective cap. Point nozzle toward area to be sprayed and press down all the way for a long-distance blast. The special nozzle will project a blast 25 feet. Treated surfaces have a residual killing action for four to six weeks against insects. If reinfestations occur, due to migrations — or removal of the insecticidal film by water or wear, repeat treatment. Avoid spraying light colored shingle roofs directly, dark stains may occur.

### PHYSICAL AND CHEMICAL HAZARDS

**EXTREMELY FLAMMABLE:** Contents under pressure. Keep away from fire, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

### ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to birds, fish, and other wildlife. Birds, especially waterfowl, feeding or drinking on treated areas may be killed. Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not apply directly to water or to area where surface water is present. Do not contaminate water by disposal. This pesticide is highly toxic to bees exposed to direct treatment or to residues on blooming plants where they feed. Do not apply this product to or allow it to drift to food crops or any desirable vegetation at any time.

### STORAGE AND DISPOSAL

**STORAGE:** Store in a cool, dry area away from heat or open flame. **DISPOSAL:** Wrap container and dispose of in trash. Do not puncture, compact or incinerate container. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with direction give herewith.
