

Ampro Kill-30

Ampro Kill-30 is an insecticide especially compounded for use in the food industries. It is a residual type insecticide with remarkably long lasting effectiveness, even when used on the exteriors of buildings. This, together with its quick "knock down" ability, gives outstanding insect control under a wide range of operating conditions.

**DIRECTIONS**

**GENERAL APPLICATION METHOD:** Apply with a low pressure sprayer which gives a coarse wet spray and little or no mist. Use an oil can to squirt insecticide into cracks, behind power outlets and switchboxes, and into places not reached by the spray.

**FLIES AND MOSQUITOES:** For best control of these pests apply the insecticide to walls and surfaces where the flies and mosquitoes rest. Apply at the rate of 1 gallon per 1000 square feet. Window and door screens are best treated by applying the insecticide with a paint brush. Frequent spraying of breeding places such as stagnant water and garbage cans will help considerably in reducing the fly and mosquito population.

**ANTS, FLEAS, ROACHES, SILVERFISH:** Use twice the amount of insecticide recommended for flies and mosquitoes. Spray areas such as basement walls, floors, doorways where insects travel. Spray into cracks where they breed and hide. Spray sleeping quarters of pet animals bothered with fleas and change

the bedding after the spraying of animal quarters. **DO NOT SPRAY THE ANIMALS THEMSELVES.** Repeat as needed.

**DIRECTIONS**

**BAKERIES** and other **FOOD INDUSTRIES** can control the above pests by spraying the walls up to a height of 5 feet and the floors for a distance of 18 inches out from the walls and squirting insecticide into cracks and behind such obstructions as power outlets and switchboxes.

**CAUTION**

Keep out of the reach of children. Do not use on household pets or human beings. Avoid contact with skin and eyes. Contact with the skin can cause toxic symptoms. May be absorbed through the skin. In case of skin contact wash exposed areas thoroughly with soap and water. Avoid breathing the spray. Do not store or use near fire or open flames. Harmful if swallowed. Avoid contamination of feed and food-stuffs.
