Keep Out of Reach of Children
Net Content: 1 1/2 oz. (1 fl. oz.)
(Can size: 20 fl. oz.)

DESCRIPTION

A highly concentrated fast knockdown insecticide in a form which quickly knocks down and rapidly kills a wide variety of both small flying and crawling insects: flies, mosquitoes, roaches and ants. This product is especially recommended for use in areas where human beings work or live such as industrial plants, offices, hotels and motels, apartment houses, hospitals and transportation facilities. Not designed for use in food processing plants.

DIRECTIONS

- To spray, hold container upright and remove cap. Point valve opening away from face and push button.
1. **FLYING INSECTS:** Flies, mosquitoes, gnats, wasps and flying moths: Close all doors and windows. Spray up into the air with sweeping motion, keep about 3 feet from interior walls, fabrics, furniture and plants. Keep room closed for about 15 minutes then remove dead insects. A 4 to 5 second spraying will usually be sufficient for about 1000 square feet. It is unnecessary to completely fill the room with mist. Repeat as necessary for control.
 2. **CRAWLING INSECTS:** Roaches, waterbugs, silverfish and crickets. Spray hiding places such as baseboards and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases and other storage areas, hitting as many insects as possible. Repeat as necessary for control.
 3. **ANTS:** Spray trails, hills, around window sills, door frames and openings around pipes and baseboards where ants crawl. Repeat as necessary for control.
 4. **CARPET BEETLES:** Spray directly on these insects, covering floors, baseboards, shelves and carpets. Repeat spraying at frequent intervals.
 5. **BLDBUGS:** Spray baseboards, mouldings, floor boards, and infested areas of carpet and rug. Spray mattresses particularly around seams and tufts. Take beds apart and spray all joints. Repeat as necessary for control.
 6. **SPIDERS, CELLAR SPIDERS, SEW BUGS:** Spray webs and places where these pests inhabit. Repeat as necessary for control.
 7. **FLEAS, TICKS:** Spray floors, bedding coverings and sleeping quarters of pets. Do not spray pets directly. Repeat applications as necessary for control.

WARNING - CONTENTS UNDER PRESSURE

Do not use in a treated area until contents of the area after treatment is complete. Exposure to temperatures above 100°F may cause container to rupture. Do not puncture or incinerate container. Avoid breathing gas or dust. Avoid contact with skin. Do not get on face.

3635-103

OXFORD DEO SECT (AFROSOL) Scented Insecticide

PURPOSE

OXFORD DEO SECT (AFROSOL) is a scented insecticide which is effective against a wide range of household and commercial insects.

WHERE USED
