

DIRECTIONS

In using this product the basic idea is to treat the harborage and surfaces over which insects crawl or on which they alight. The invisible residue left on the treated surfaces persists for several weeks or more and kills insects which come in contact with it.

ROACHES

Apply liberally to harborage and surfaces over which roaches crawl and alight. In addition, spray the floor, walls, and ceiling of infested areas. Repeat treatment as needed.

ANTS

Apply to the soil in harborage areas and to the soil in cracks and crevices. Repeat treatment as needed.

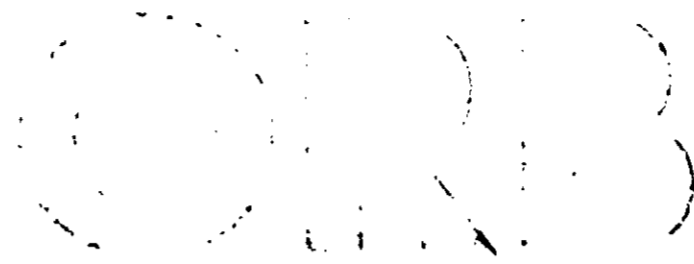

FLYSPINNERS

Apply to the soil in harborage areas and to the soil in cracks and crevices. Repeat treatment as needed.

CAMPBELL WEEVIL

Apply to the soil in harborage areas and to the soil in cracks and crevices. Repeat treatment as needed.

CAUTION

Contents of this can are under pressure. Do not store near heat, in direct rays of sun, in closed cars in the sun or in any other location where temperatures will exceed 110 deg. F. If exposed to high temperatures, excessive pressure will develop and may cause can to burst as with other aerosol cans. Do not spray near food or family as spray is flammable. Do not puncture or mutilate can. Keep out of reach of children. Avoid contact with eyes, nose, mouth, and skin. If contact occurs, flush with water. If inhaled, get fresh air. If swallowed, do not induce vomiting. Consult physician if symptoms persist.

Harmful if swallowed

Contains Malathion
