Total	100.00%

* Equivalent to 1.0% Vapona^(B) Insecticide

DIRECTIONS FOR USE

FACE FLIES, HORSE FLIES, MOSQUITOES, HOUSE FLIES ON BEEF AND DAIRY CATTLE: Use a mist type hand sprayer or automatic unit that will insure a fine spray mist for desired coverage of the animal. For Face Flies spray the forehead, taking care to avoid spraying the eyes. For Horse Flies, direct the spray mist to the back, withers, and belly of the cattle. Make 2 applications of one ounce each day. Treat in the morning and the evening.

STABLE FLIES: Apply at same rate and timing as for Horse Flies; however, direct the spray to the leg areas making sure to directly spray the ankles.

NOTE: Do not exceed the maximum dose of 2 ounces per animal daily. For effective Fly control, Vapona Show-Coat Dairy Cattle Spray should be used as directed. It is highly toxic to flies but loses its strength within the day as most dairy cattle sprays. For this reason, no insecticidal residue is built up. A well planned Fly Control Program that includes the 2 spray applications per day as directed will give results.

WARNING: May be fatal if swallowed, inhaled or absorbed through skin. Do not inhale spray mist. Avoid contact with skin; wash thoroughly after using. This product is an organic phosphate which is a cholinesterase inhibitor and if poisoning should occur, CALL A PHYSICIAN IMMEDIATELY, ATROPINE IS ANTIDOTAL.

CAUTION: Empty containers should be destroyed; never re-use. Either punch holes in them and burn them (stay out of smoke) or bury them with any spillage or spray contents in non-crop areas away from water supplies.

Do not allow the spray mist to contaminate milk or milking utensils. Cover feed and feed troughs or remove before spraying.

This material is toxic to fish. Do not contaminate any body of water by cleaning or equipment or disposal of waste.

NON-WARRANTY: The seller makes no warranty of any kind, expressed or implied, concerning the use of this product. The buyer assumes all risk of use or handling, whether in accordance with directions or not.
