BACK PANEL

Directions

TO KILL FLYING INSECTS: Flies, Mosquitoes, Sand Flies and similar small flying insects direct spray into the air allowing about 5 to 6 seconds for an average size room, 12' x 12' with a 6' ceiling.

TO KILL CRAWLING INSECTS: Ants, Roaches, Silverfish and spiders, spray into cracks, crevices, around door and window frames. Spray ant trails. Spray under sinks, in cabinets, under refrigerator and stove or any place where insects are noticed or may be hiding. Spray directly on insects when possible.

TO KILL STORED PRODUCT INSECTS: Weevils, Flour Beetles, Chestnut Weevils, Carpet Beetles, Drug Store Beetles in exposed adult and larvae stages. Spray insects, into cracks, crevices, around machinery, around containers of stored products and other areas where these insects may hide. It is important to contact as many insects as possible. A minimum of 10 second treatment time should be used per 100 square feet of floor space. Repeat treatment weekly or as insects appear.

PRECAUTIONS: Contents under pressure. Do not use near fire or open flame. Do not store in direct sunlight or temperature in excess of 120° F. Do not inhale. Avoid contamination of feed and foodstuffs. Foods should be removed or covered during treatment. Do not use as a space spray in food processing plants when the plants are in operation. Foods and food processing surfaces should be covered during treatment. All food processing surfaces should be cleaned after treatment. Remove rats and mice and cover the holes, before spraying.

ACTIVE INGREDIENTS: Dicyclohexyl Dimethylcarbamate, 11.4%; Butoxydimethylcarbamate, 1.6%; Technical Diethyl Malathion, 1.0%; Isopropyl Alcohol, 1.0%.

OTHER INGREDIENTS: 88.0%

* equivalent to 0.4% of Dicyclohexyl (6-propylpiperonyl) ether and 0.1% related compounds.
