ACTIVE INGREDIENT: Sodium dichloro-s-triazine	34.0%
INERT INGREDIENTS*	66.0%
*Inert ingredients (d.i.) include:	
<b>TOTAL</b>	<b>100.0%</b>

**WARNING: KEEP OUT OF REACH OF CHILDREN**      See other warnings on back panel

BEST DOCUMENT AVAILABLE

This product is formulated as an initial chemical treatment for available chlorine to satisfy the initial demand in pool water of trihydroxytriazine (chlorine stabilizer). This product has 1.5 lbs of the pool water.

DIRECTIONS

Backwash the filter system before adding this product to the pool. Add 1.5 lbs of stabilizer, one container (1.5 lbs.) per 4000 gal over the surface of the water. For pools with plastic recirculation skimmer. Maintain pool water circulation continuously.

When the chemical reaches the filter system, the chemical is dissolved. Do not backwash the filter for 24 hours.

There will be an initial high chlorine reading and the pool water will be 3.0 parts per million. Test pool water frequently with a test kit. Frequent treatment with a suitable chlorine concentration is required. Do not reuse the filter. Destroy when empty.

U.S. PAT. NO. 3,111,116

First Aid: Call your doctor.

For skin and eyes, immediately flood with large amounts of water.

For ingestion: Take large amounts of milk, followed by mineral or cooking oil.
