

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Antimicrobials Division (7510P)
 1200 Pennsylvania Ave., N.W.
 Washington, D.C. 20460

EPA Reg. Number:

5185-514

Date of Issuance:

4/16/18

NOTICE OF PESTICIDE:

Registration
 Reregistration
 (under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

BioLab Granular Trichlor 21

Name and Address of Registrant (include ZIP Code):

Bio-Lab, Inc.
 c/o Delta Analytical Corp.
 12510 Prosperity Drive, Suite 160
 Silver Spring, MD 20904

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

Signature of Approving Official:

Demson Fuller, Product Manager 32
 Regulatory Management Branch II
 Antimicrobials Division (7510P)

Date:

4/16/18

2. Be aware that proposed data requirements have been identified in a Chlorinated Isocyanurates Final Work Plan. For more information on these proposed data requirements, you may contact the Reevaluation Team Leader (Team 36): <http://www2.epa.gov/pesticide-contacts/contacts-office-pesticide-programsantimicrobial-division>:
3. Make the following label changes before you release the product for shipment:
 - Revise the EPA Registration Number to read, “EPA Reg. No. 5185-514.”
4. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 10/04/2017
- Alternate CSF 1 dated 10/04/2017

If you have any questions, you may contact Ben Chambliss at (703) 308-8174 or via email at chambliss.ben@epa.gov.

Sincerely,

Demson Fuller, Product Manager 32

{Directions to be used for swimming pool sanitization product}

SWIMMING POOL SANITIZER

{To maintain brand segmentation, two sets of marketing statements are provided to maintain separate brand identity. One of the following Options will be used on the label.}

{Option 1}

This [patented] [multifunctional] sanitizer and shock product, when applied [in dry form] directly to the pool or skimmer per the label directions, kills bacteria and unsightly algae, clears up cloudy water and inhibits future algae growth. This product provides the perfect solution for clear inviting pool water. [Specifically you can use this product:]

- [For routine daily chlorination (sanitation)]
- [To superchlorinate]
- [To shock]
- [To kill algae]

{Option 2}

[BioLab Granular Trichlor 21] *{or}* [This product] is a compound action product:

- Sanitizes – to kill bacteria
- Shocks – to destroy swimmer contaminants
- Clarifies – to clear water
- Algicide – kills algae

Apply [BioLab Granular Trichlor 21] *{or}* [this product] directly to the pool or through the skimmer per label directions. Routine use of [BioLab Granular Trichlor 21] *{or}* [this product] provides pool owners crystal clear sparkling water. [BioLab Granular Trichlor 21] *{or}* [this product] has SUNSHIELD® that protects the chlorine active ingredient from degrading due to sunlight. [This product can be used:]

- [As a routine sanitizer]
- [To super chlorinate]
- [To shock]
- [To kill algae]

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **READ ENTIRE LABEL AND USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS FOR USE.**

Ensure all pool equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2-7.6. In chlorinated pools, add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. When using other products as outlined in the directions for this product, always follow directions on those products.

APPLICATION METHOD: DO NOT pre-dissolve this product before adding to pool or skimmer. DO NOT mix this product with any other products or chemicals. Always apply this product in its dry form using a clean dry plastic cup or scoop. Do not use this cup or scoop for any other purpose. This product should be applied [in its dry form] directly to pool or through the skimmer as follows:

Directly to Pool: Add product in dry form directly to the pool water by broadcasting evenly across the surface of the pool, with the pump operating for at least 2 to 4 hours. If your pool has a bleachable surface, such as vinyl, colored plaster, painted or fiberglass, use skimmer application, or add directly to pool, brushing visible product until completely dissolved to avoid bleaching. [If you have a vinyl liner and cannot see the bottom of your pool, apply this product directly to skimmer to avoid bleaching.]

Directly to Skimmer: Add product in dry form directly through the skimmer with the basket removed (along with any product in skimmer) and the pump operating. Rinse the skimmer of any undissolved product. Replace the skimmer basket (along with any removed product) and keep the pump running for at least 2 to 4 hours.

[INITIAL STARTUP: Use this method if you are opening your pool in the spring, the pool has not been maintained for several weeks, or if the pool is freshly filled. Brush all pool surfaces with pump operating. Following the appropriate *Application Method*, add 1 lb. (2, 8oz cups) of this product in dry form per 10,000 gallons of pool water. After two hours, test chlorine level (residual). Repeat dosage until you obtain a chlorine level of 1 - 4 ppm.]

[ROUTINE CHLORINATION: Following the appropriate *Application Method*, add 2 to 4 oz (1/4 to 1/2, 8oz cup) of this product in dry form per 10,000 gallons of pool water every day, every other day or as often as needed to maintain a chlorine level between 1 - 4 ppm. The amount of product required and frequency of addition will vary with the number of swimmers, water temperature and amount of rain. Operate the pump a minimum of 10 hours per day for best results.]

[SHOCK TREATMENT: For best results, apply product weekly as part of your maintenance routine, or when bather loads are high, water appears hazy or dull, unpleasant odors or eye irritation occurs, or after heavy rain. Following the appropriate *Application Method*, add 1 lb. (2, 8oz cups) of this product in dry form per 10,000 gallons of pool water.]

[ALGAE TREATMENT: With pump operating, brush algae from pool surfaces. Following the appropriate *Application Method*, add 1 lb. (2, 8oz cups) of this product in dry form per 10,000 gallons of pool water for light algae growth. Add 2 lb. (4, 8oz cups) of this product in dry form per 10,000 gallons of pool water for moderate to heavy algae growth. If necessary, repeat the treatment.]

[WINTERIZATION: If algae is present, treat using ALGAE TREATMENT directions, then proceed as follows: To an algae free pool, add 2 lb. (4, 8oz cups) of this product in dry form per 10,000 gallons of pool water following the appropriate *Application Method*. Cover the pool with a pool cover and prepare heater, pump, and filter components for winter using manufacturer's recommendations.]

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.

{Directions to be used for superchlorination/shock product}

FOR POOL SHOCK AND SUPERCHLORINATION

{To maintain brand segmentation, two sets of marketing statements are provided to maintain separate brand identity. One of the following Options will be used on the label.}

{Option 1}

[BioLab Granular Trichlor 21]{or}[This product] is a compound action product:

- Sanitizes – to kill bacteria
- Shocks – to destroy swimmer contaminants
- Clarifies – to clear water
- Algicide – kills algae

Apply [BioLab Granular Trichlor 21] {or} [this product] directly to the pool or through the skimmer per label directions. Routine use of [BioLab Granular Trichlor 21] {or} [this product] provides pool owners crystal clear sparkling water. [BioLab Granular Trichlor 21] {or} [this product] has SUNSHIELD® that protects the chlorine active ingredient from degrading due to sunlight. [This product can be used:]

- [To super chlorinate]
- [To shock]
- [To kill algae]

{Option 2}

This [patented] [multifunctional] product, when applied [in dry form] directly to the pool or skimmer per the label directions, kills bacteria and unsightly algae, clears up cloudy water and inhibits future algae growth. This product provides the perfect solution for clear inviting pool water. Shock treatment is needed when bather loads are high, water appears hazy or dull, unpleasant odors or eye irritation occurs, or after heavy rain. [Specifically you can use this product:]

- [To superchlorinate]

(4, 8oz cups) of this product in dry form per 10,000 gallons of pool water following the appropriate *Application Method*. Cover the pool with a pool cover and prepare heater, pump, and filter components for winter using manufacturer's recommendations.]

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.

{Directions to be used for winter swimming pool treatment}

WINTER SWIMMING POOL TREATMENT

[BioGuard® has a wide variety of products to care for your pool during the off season. These products are designated as “Off Season”.]

To avoid costly spring problems (algae, stains, cloudy water, high chlorine demand) properly prepare your pool for the winter using this product. This product oxidizes organic wastes, helps keep pool surfaces clean, and helps protect water during the off season months.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Before treating the pool, chemically balance the water and adjust pH to 7.4 - 7.6. Brush and vacuum the pool. Chemically clean the filter and clean skimmer and pump baskets.

{For application as a Shock when sold in a child resistant bag}

[APPLICATION METHOD: DO NOT pre-dissolve this product before adding to pool or skimmer. DO NOT mix this product with any other products or chemicals. This product should be applied [in its dry form] directly to pool or through the skimmer as follows:]

{For application as a Shock when sold in a bottle/bucket}

[APPLICATION METHOD: DO NOT pre-dissolve this product before adding to pool or skimmer. DO NOT mix this product with any other products or chemicals. Always apply this product in its dry form using a clean dry plastic cup or scoop. Do not use this cup or scoop for any other purpose. This product should be applied [in its dry form] directly to pool or through the skimmer as follows:]

Directly to Pool: Add product in dry form directly to the pool water by broadcasting evenly across the surface of the pool, with the pump operating for at least 2 to 4 hours.

NOTE: For WHITE PLASTER POOLS, broadcast this product directly into the pool water. FOR VINYL, FIBERGLASS, PAINTED AND COLORED PLASTER POOLS, ADD DIRECTLY TO SKIMMER (SEE BELOW).

Directly to Skimmer: Add product in dry form directly through the skimmer with the basket removed (along with any product in skimmer) and the pump operating. Rinse the skimmer of any undissolved product. Replace the skimmer basket (along with any removed product) and keep the pump running for at least 2 to 4 hours.

WINTERIZATION: Following the appropriate *Application Method*, add 2 lb. of this product in dry form per 10,000 gallons of pool water. Circulate water for several hours, then apply a BioGuard winterizing algae treatment following appropriate directions. Turn off pump. Drain equipment or add a swimming pool antifreeze to equipment to prevent freeze damage. Install pool cover. A second

treatment of this product in mesh covered or non-covered pools may be required prior to water freezing (mid-winter). If second treatment is applicable, only apply if able to add product with pump running according to the *Application Methods* described above.

{Directions to be used for spa and hot tub sanitization}

SPA AND HOT TUB SANITIZER:

When used as directed, this product is effective as a sanitizing agent for spa and hot tub water.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all spa and hot tub equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in the directions for this product, always follow directions on those products.

MAINTENANCE DOSES: With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) directly to the spa water as an initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3 - 5 ppm of available chlorine is established as determined by test kit [or test strips]. A test kit [or test strips] must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3 - 5 ppm.

[SUPERCHLORINATION] {or} [SHOCK]: With pump on, add one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons) directly to the spa water. Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.

Reentry into treated spas is prohibited above levels of 5 ppm chlorine due to risk of body injury.

{Directions to be used for spa and hot tub shock / superchlorination}

SPA AND HOT TUB [SHOCK] [SUPERCHLORINATION]:

When used as directed, this product is effective as a [shock] [superchlorination] treatment for spa and hot tub water.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all spa and hot tub equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in the directions for this product, always follow directions on those products.

[SUPERCHLORINATION] {or} [SHOCK]: With pump on, add one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons) directly to the spa water. Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.

Reentry into treated spas is prohibited above levels of 5 ppm chlorine due to risk of body injury.

{Storage and Disposal directions when product is sold in bottles/buckets.}

[STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Keep area ventilated until all fumes are gone. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.]

{Storage and Disposal directions when product is sold in bags.}

[STORAGE AND DISPOSAL: Keep this product dry in its original unopened bag until use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Keep area ventilated until all fumes are gone. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.]

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Avoid breathing dust or fumes. Wear goggles or safety glasses and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

{{When First Aid is not located on front panel of label, it will be separated by line rules from adjacent text and be in a different color.}}

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. [IN CASE OF MEDICAL EMERGENCY, CALL [1-877-800-5553] [or other phone number]

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS AN OXIDIZING AGENT: DO NOT mix with other products or chemicals. Never add water to product. Always add product

in dry form directly to pool or pool skimmer. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire, and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

{Environmental hazards statement for end-use products in containers of less than 5 gallons (liquid) or less than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers of equal to or greater than 5 gallons (liquid) or equal to or greater than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]

NOTE: Buyer assumes all responsibilities for safety and use not in accordance with directions.

HOW TO CALCULATE POOL CAPACITY

Shape of Pool Gallons of water

Rectangular Average depth x average length x average width x 7.5

Circular Diameter x diameter x average depth x 5.9

Oval Full width x full length x average depth x 6.7

Irregular Consult pool builder
