DIRECTIONS

When applied as an aerosol with the Hub States Pulsfog Applicator Hub States Formula F-18 is recommended for control of Cigarette Beetles, and Tobacco Moths in buildings where tobacco is stored.

PREPARATION OF THE BUILDING PRIOR TO FOGGING: (1) Close all doors, windows, and ventilators, (2) Lock or barricade all entrances, turn off pilot lights, post warning signs, and take precautions to prevent persons and animals from entering the area. (3) Room temperature should read over 70° F. for best insect kill.

FOR CIGARETTE BEETLE AND TOBACCO MOTH CONTROL IN TOBACCO STORAGE ROOMS: Open the metering valve on the Pulsfog counter-clockwise to the No. 4 setting on the dial. Eight ounces of liquid insecticide will be fogged per minute with a mass median diameter of 5 microns.

Use 3 ounces of Hub States Formula F-18 per 1,000 cubic feet of warehouse space. This is essential to give adequate distribution in large warehouses. Walk backward down the center aisle of the room, swaying the Pulsfog back and forth to blanket the entire cubical contents of the room. Length of exposure time is 2 hours with windows and doors closed. After this exposure time, the room should be ventilated - at least 1 hour before re-entering.
