US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 5770-4	DATE OF ISSUANCE <b>18 AUG 1988</b>
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT Triple C Liquid Bactericide	

**NOTICE OF PESTICIDE:**  REGISTRATION  
 REREGISTRATION  
 (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Micro Products Company  
 6011 West 53th Place  
 P.O. Box 504  
 Arvada, CO 80002

**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The registrant is notified that the registration of this pesticide is conditional upon the registrant's compliance with the following conditions:

1. The registrant shall file a copy of the label for this pesticide with the Registration Division within 30 days of the date of registration.
2. The registrant shall file a copy of the label for this pesticide with the State of Colorado within 30 days of the date of registration.
3. The registrant shall file a copy of the label for this pesticide with the State of Colorado within 30 days of the date of registration.
4. The registrant shall file a copy of the label for this pesticide with the State of Colorado within 30 days of the date of registration.

If these conditions are not complied with, the registration of this pesticide shall be suspended or canceled.

~~FOR THE USE OF THE PUBLIC & EPA REGIONAL OFFICES FOR COORDINATING THE LABELING~~

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

LAUNDRY Instructions: To Clean & Brighten Fabrics- Add 1/2 cup X-O-X to wash water, add soap. Turn on agitation while putting in clothes. Use normal to heavy wash cycle, as required to clean. To Sanitize- (200 ppm) Thoroughly mix 2.5-3oz X-O-X with 10 gals water, add clothes. Wait 5 minutes, add detergent and start wash cycle.

To Disinfect- (400 ppm) Follow same procedure as To Sanitize using twice the amount of X-O-X. Caution: Colors will fade at this concentration.

FOOD CONTACT SURFACE SANITIZING

HARD SURFACE Sanitizing- (100-200 ppm) For either Rinse or Immersion method: Mix 1.5-3 oz. X-O-X into every 10 gals. of water. Rinse or Immerse PREVIOUSLY CLEANED articles for at least 2 minutes. Do NOT follow with a clean water rinse. Allow to dry before use.

POROUS SURFACE Sanitizing- (600 ppm) For either Rinse or Immersion method: Mix 8 oz. X-O-X into every 10 gals. of water. Rinse or Immerse PREVIOUSLY CLEANED articles for at least 2 minutes. Follow with a final rinse (200 ppm) as directed in HARD SURFACE Sanitizing instructions.

MEAT & POULTRY Processing Areas: (200 ppm) Clean areas and equipment in standard manner. Follow HARD SURFACE Sanitizing instructions. Do NOT allow solution to come in contact with meat, poultry, food or feed.

The above concentrations may also be checked for Solution Strength/Available Chlorine by testing with a Chlorine Test Kit. To insure results use the chlorine test kit as specified by the manufacturer to maintain solution strength (indicated ppm) as directed under specific use instructions. Concentrations listed below should only be mixed and maintained with a reliable Chlorine Test Kit. Someone knowledgeable in its use is necessary to insure the proper results.

SWIMMING POOL Instructions: Maintenance Sanitizing- (0.6-1.0 ppm) Maintain available chlorine levels as required by local Health authorities. Stabilized pools require 1.0-1.5 ppm residual levels of available chlorine. Pools should be checked frequently and X-O-X added as necessary. Superchlorination- (5-10 ppm) Weekly, or as necessary introduce a solution containing higher levels of available chlorine should be introduced to insure proper levels of hygiene are met. Check with local Health authorities to determine level and frequency of treatment. After treatment allow the level of chlorine to drop back down to safe levels (1.0-3.0 ppm) before allowing people to reenter pool.

~~THE INFORMATION ON THE SPECIFIC USE DIRECTIONS PANEL RELATES TO NON-PESTICIDAL USES ONLY~~
