

IMPORTANT INFORMATION

1. Be sure soil is moist before treatment. During dry spells, water lawns thoroughly before applications are made.
2. Keep lawn mowed at 1" to 1½" during treatment.
3. Normal rainfall after applications will not affect results but continue regular watering practices for two days after application.
4. Newly seeded lawns should not be treated until the third mowing.
5. Determine the square footage to be treated by multiplying the length of the area by the width (for example, an area 20 ft. x 50 ft. contains 1,000 sq. ft.). Measure the area to be treated and material used accurately.

CAUTION: Harmful if swallowed. Do not get in eyes or on skin. If spilled on skin, wash off immediately with warm water and soap. Avoid inhalation of spray mist. Avoid contamination of feed, food-stuffs, streams or other water sources. Keep out of reach of children and stock.
