Keep children and pets away from treated areas until product is dry. Do not broadcast application to lawn. Wash hands thoroughly after handling. This product contains an organic phosphate which is cholinesterase inhibitor. If swallowed, induce vomiting and call a physician immediately. Note to physician: Antidote - Atropine Sulfate and/or 2 PAM.

### ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not contaminate water by cleaning of equipment or disposal of wastes.

### GENERAL DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Please use the product in the manner indicated below. Watering and duration of spray application before use is important to receive the maximum benefits afforded by this effective and easy-to-use garden control. Avoid contact of this material with hands, wear rubber gloves. Use the handy 1/2 oz. measure enclosed in the product.

Systemic action controls many plant pests that attack roses. It works in the plant system to move nutrients and minerals around plants and to the BLACK LEAF SYSTEMIC 3 is absorbed by roots and moves to all parts of the plant through the sap stream.

**BLACK LEAF SYSTEMIC 3** is an effective gardener's helper which combines both systemic action and residual action to protect plants from materials containing nitrogen, phosphorus and potassium to provide your plant with the necessary nutrients to maintain strong, healthy growth.

A second use of this product is as a weed preventer which will enable you to maintain a weed-free garden after using this product as directed. The systemic action of **BLACK LEAF SYSTEMIC 3** causes the insecticide to be absorbed into the entire plant through the root system, causing severe damage that can be visible 2 days.

#### Aphids

• *Chrysanthemum*  
• *Cabbage*  
• *Carrots*

#### Caterpillars

• *Broccoli*  
• *Cabbage*  
• *Carrots*

#### Plant louse

• *Broccoli*  
• *Mimosa*  
• *Webworm*

It is recommended before using this product that you clear the garden of existing weeds. Wait until the plants have at least one inch of new growth which usually occurs very early in the spring.

**CAUTION:** Do not use near flowers and pachysandra.

This material should be used in the basic rate of one pound of the product to each 50 square feet of land area. Watering is established with weed and insect control materials at the same time after very young plants. Spread out approximately 2 quarts of the material evenly in a circle 30 inches in diameter around the base of each plant working the material into the soil and watering thoroughly. So after the material is absorbed, then water the garden bed to make sure all seedlings of undesirable weeds are destroyed.

### How to use

TYPE OF PLANT	HOW TO APPLY	WATERING
• <i>Rose</i>	• <b>BLACK LEAF SYSTEMIC 3</b> is applied at the rate of one pound per 50 square feet of land area.
