

FOR APPLICATION IN SPRAYING MACHINES

Count Down Vaporizer Concentrate is a concentrated insecticide, for application in spraying equipment, such as the Tifa Fog, Microsol, Challenger Generators, Tornado, Bes-Kill Aerosol Generator, electric and compressed air applicators, and similar equipment. For use in institutions, hotels, restaurants, school cafeterias, hospitals, clubs and food processing plants. Used as recommended, Count Down Vaporizer Concentrate is highly effective, and can be used around food, food products, utensils and equipment, but should not be applied directly to uncovered food or foodstuffs. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation. Do not remain in treated areas. Ventilate the treated areas when treatment is complete.

DIRECTIONS FOR USE:

- CONTACT SPRAY-To control exposed or accessible stages of the granary weevil, rice weevil, confused flour beetle, rust red flour beetle, cadelle, saw toothed grain bettle and grain moth. Apply in a good machine adjusted to deliver a coarse droplet spray using 1 gallon Count Down Vaporizer Concentrate to 750 square feet of surface. Repeat as needed. In addition to immediate kill, the walls, ceiling, lights, moldings and screens are made unfavorable as resting or hiding places of these insects.
- **SPACE SPRAY**—To give rapid kill of flying and crawling stages of granary weevil, rice weevil, confused flour beetle, rust red flour beetle, cadelle, saw toothed grain beetle and grain moth, adjust machine for fine mist. When possible, keep doors and windows closed for 10 minutes after application. Against flying pests, direct the spray toward upper portion of enclosure filling the room with mist using 2 oz. of Count Down Vaporizer Concentrate to each 1000 cubic feet of space. In control of the active stages of the above insects when running or crawling, direct mist into all places inhabited by insects and apply at the rate of 4 oz. per 1000 cubic feet of space.
