

"BEST 50% MALATHION INSECT SPRAY"

DOGS & CATS: Fleas, Lice and Ticks: Apply 1 oz. of 50% Malathion Insect Spray per gallon of water in a hand sprayer. Thoroughly wet the animal, keeping the solution out of the pet's eyes. If the animal is confined to an area which is free of fleas, one treatment may suffice. If, however, the animal is allowed to run free, it may become re-infected. Examine the animal every three weeks and re-treat if fleas are present.

Premise treatment: Animals become re-infected unless the pet's quarters, yard and lawns are also treated.

Fleas, ticks. Remove manure or debris from these areas and spray using 5 oz. of 50% Malathion Insect Spray in 1 gallon of water and spray at the rate of 1 gallon of the mixture per each 1,000 sq. ft. Repeat treatment in 3-4 weeks if necessary.

50% MALATHION INSECT SPRAY
