**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or trademark if it has been covered by others.

# NASCOTE II BLACK WOOD PRESERVATIVE

**Protects wood in contact with soil and water.  
Protects against wood rot, termite damage, mildew  
and moisture.  
For exterior or outdoor use only.**

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NASCOTE II is a black wood preservative designed to provide an appearance comparable to that of creosote. If a clear wood finish or subsequent painting are desired, use NASCOTE Clear Wood Preservative. NASCOTE II Black Wood Preservative provides protection against moisture, rot and mildew on any natural wood surface. This copper naphthenate wood preservative and insecticide will preserve, protect and seal wood surfaces that will be in contact with soil, water or concrete.

NASCOTE II is only intended for use on exterior wood. Do not apply to food or feed contact surfaces or to surfaces which might be chewed or licked by animals or livestock. Do not contaminate drinking water with treated contact surfaces. Wood should be clean, dry, well seasoned and free of bark.

For best results, NASCOTE II should be applied by immersion so as to effect maximum penetration into the wood and heavy absorption especially at joints and wherever end grain exists. Allow five minutes of immersion per inch of wood thickness. Fenceposts, pole, foundation timbers and heavy wooden members should be immersed for 12 to 48 hours. If immersion is impractical, two liberal coats of this product should be applied by brush or roller allowing the first coat to penetrate thoroughly before applying the second. Treatment of end grain is especially important. All unsound wood should be cut out and removed two feet beyond any visible evidence of decay. All wood should be normally dry, and the framing or cutting completed before application of this product.

Do not thin — material is supplied at proper application consistency. Clean painting equipment with mineral spirits for quick cleanup. Do not apply over painted or varnished surfaces. Do not apply over bark.

## LIMIT OF WARRANTY AND LIABILITY

This company warrants that this material conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use. This product is sold subject to understanding that the buyer assumes all risks of use or handling of this material not in strict accordance with the directions given herewith which are beyond the control of the seller, such as for example, incompatibility with other products and manner of its use or application. **NO OTHER EXPRESSED OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY IS MADE.** The exclusive remedy of the buyer and the limits of liability of this company or any other seller for any and all losses, injuries or damages resulting from the use or handling of this product shall be the purchase price paid by the user or buyer for the quantity of the product involved. The buyer and users are deemed to have accepted the terms of this Notice which may not be varied by any verbal or written agreement.

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)

### WARNING COMBUSTIBLE KEEP OUT OF THE REACH OF CHILDREN

Harmful if swallowed or absorbed through skin, or on clothing. Wear goggles or eye protection during handling and application. Impervious gloves (e.g., nitrile coated) are recommended during the use of this product to prevent skin contact. Wash thoroughly before eating, drinking, using tobacco or entering a confined space. Avoid breathing vapors or spray mist.

## FIRST AID

If swallowed, do not induce vomiting. CALL POISON CONTROL CENTER. If in eyes, flush with plenty of water for at least 15 minutes. Get medical attention. For skin contact, wash thoroughly with soap and water. Contaminated clothing, remove and wash separately.

## ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply to water bodies. Do not contaminate water by cleaning of equipment or disposal. Apply this product only as specified on label.

## PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flame. Use with adequate ventilation. Close containers immediately after use.

## STORAGE

Do not contaminate water, food, or feed with storage or disposal. Store at temperatures between 40°F and 100°F. If spilled or is leaking, remove the source of the spill. Absorb spilled liquid. Spread absorbent, then pick up. When applicable, wash area with detergent and water. Store in original container only. Do not store in unapproved containers. Keep container closed when not in use.

## DISPOSAL

Triple rinse (or equivalent). Then offer to specialized contractor, or puncture and dispose of in a sanitary landfill, or procedure approved by state and local authorities.

## USES

Protects the following type of wood: Sheds, doors, decks, spars, docks, piers, house siding, staking material, and landscaping material.

**COVERAGE:** 5 to 10 gallons per thousand square feet  
100 to 300 square feet per gallon for brush application
