NOTIFICATION
APR 16 2004

Supplemental Labeling

To Control Ants: Carpenter Ants and Nuisance Ants (Including Argentine Ants, Big-Headed Ants, Odorous House Ants and Pavement Ants)

For use by individuals/firms licensed or registered by the state to apply termiticide/insecticide products.

EPA Reg. No. 7969-210

FOLLOW ALL APPLICABLE FIRST AID AND PRECAUTIONARY STATEMENTS, DIRECTIONS FOR USE, MIXING INSTRUCTIONS, RESTRICTIONS AND LIMITED WARRANTY AND DISCLAIMER ON THE EPA REGISTERED LABEL.

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read the label before using this product. States may have more restrictive requirements regarding qualifications of persons using this product. Consult the structural pest control regulatory agency of your state prior to use of this product.

CARPENTER ANTS AND NUISANCE ANT CONTROL

For control of ants around houses and other structures, apply 0.06% **TERMIDOR® SC Termiticide/Insecticide** to the structure exterior as a low pressure coarse spray where ants enter the structure, trail around the structure or where they crawl and hide. Also spray 0.06% **TERMIDOR® SC Termiticide/Insecticide** around doors, windows, vents, pipes or any other exterior openings (including foundation cracks or drilled holes) where ants could enter the structure. Be especially careful to treat the joint where exterior siding (wood, vinyl, aluminum or any similar material) meets the cement, block or brick foundation. Treat all areas where any wires (electrical, telephone or cable) enter the house. This treatment should be made as a general surface spray, crack and crevice spray or wall void application. Apply 2 quarts of 0.06% **TERMIDOR® SC Termiticide/Insecticide** finished spray per 160 linear feet. (This rate is approximately 1.5 gallons finished spray per 1000 square feet). Application is made one foot out and one foot up the foundation wall with a maximum number of 2 applications per year.

It is also necessary to remove or prune away all shrubbery, bushes, tree branches (dead or alive) touching the structure. This vegetation touching the structure offers a route of entry for ants into the structure and a method for the ants to continue to inhabit the structure without coming in contact with the treatment. If nests are found, direct treatment of **TERMIDOR® SC Termiticide/Insecticide** can be made to these nests.

Do not allow residents and pets into the immediate area during application and do not contact treated areas until sprays have dried.

Re: Final Print Notification of Supplemental labeling for Termidor® SC Termiticide/Insecticide
EPA Registration Number 7969-210.

Document Processing Desk:

Attached is a final print label for Termidor SC: EPA Registration Number 7969-210. This supplemental label includes the previously approved use directions for use on ants.

While these directions are included on all product now produced we require this supplemental label for use with product in inventory, which does not have the nuisance ant labeling. As you recall we recently product was recently transferred from BAYER to BASF the previous registration number was 432-901.

Attached to support this Notification please

1. Highlighted copy of the approved label with use directions for Nuisance Ant Control dated June 16, 2003.
2. A copy of the Final Print Notification Supplemental label.
3. Five (5) loose copies of the final print label.
4. One complete EPA Form 8570-1.

If you have any questions concerning this notification Please contact me directly at 919 547-2657 or E-Mail at obyrm@d@basf-corp.com.

Respectfully Submitted,

Daniel J. O'Byrne
