

For Controlling Certain Apple Diseases and Insects (Contains Captan and Sevin)

ACTIVE INGREDIENTS:

Captan (N-trichloromethylthio-4-cyclohexene-1,2-dicarboximide) -----	10.00
*Carbaryl (1-Naphthyl N-methylcarbamate) -----	20.00
INERT INGREDIENTS: -----	70.00

*Sevin is a product of Union Carbide, under U. S. Patent 2,903,475.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

CAUTION KEEP OUT OF REACH OF CHILDREN.

Harmful if inhaled or swallowed. Do not breathe dust. Do not take internally. Skin contact may be harmful. Avoid unnecessary contact. Wash hands before eating. Take shower or bath after work. Wear regular long-sleeved work clothing. Change to clean clothing daily. Avoid storage near feed and food products.

NOTE FOR PHYSICIAN: Carbaryl is a moderate reversible Cholinesterase inhibitor. Atropine is antidotal.

For protection of honey bees, avoid use, if possible, during periods when honey bees are visiting the crop. When necessary to use during such periods, warn beekeepers well in advance to locate hives at a safe distance until 1 week after application.

This product is toxic to fish. Do not contaminate any body of water nor apply when conditions favor drift from the crop area treated.

STATEMENT OF LIABILITY: Agway warrants that this material conforms to the chemical description on the label and is fit for the purposes referred to in the directions, subject to the inherent risks referred to therein. Agway makes no other express or implied warranty of fitness or of merchantability, and no agent of Agway is authorized to do so except in writing, with a specific reference to this warranty. Any damages arising from a breach of this warranty shall be limited to the purchase price and shall not include consequential damages.

DIRECTIONS

Because of the range of conditions under which this product may be used, it is impossible to eliminate all risks inherently associated with its use, such as, the risk of ineffectiveness, of plant and animal injury, or of excessive residues, etc., even though the product is used in accordance with these directions. Agway offers this product subject to the understanding that the buyer assumes all such risks.

APPLES: For control of Apple Scab, Bitter Rot, Brooks Fruit Spot, Fly-Speck, Frog Eye Leaf Spot, Codling Moth, Green Aphid, Maggot, Curculio, Red-banded and Fruit Tree Leaf Rollers, Cicada, Bud Moth and Japanese Beetle.

This material is recommended primarily for use as third cover and later cover applications. Apply on a protective schedule. Apply 35 to 40 pounds per acre by aircraft or suitable ground equipment as third cover application and repeat at 10 to 14 day intervals as necessary.

CAUTION: Application within 30 days after full bloom may provide fruit thinning. To avoid thinning, delay use until at least 30 days after bloom. Do not use on Apples within 10 days of an oil spray. May cause leaf spotting on Red Delicious and Baldwin varieties. Do not apply to apples within 1 day of harvest.

NOTE: This pesticide is to be sold ONLY in this original unbroken package.
