CAUTION**

Read entire label before using this product

#### FOR ESTABLISHED LAWNS ONLY

1. Prevents Crabgrass and other annual lawn weeds
2. Plus Fertilizes your Lawn with 20-5-7

AGWAY GREENLAWN PLUS 20-5-7 WITH 5% DACTHAL is a very effective fertilizer and crabgrass control preemergent herbicide compound. The fertilizer ingredients provide for vigorous, hardy turf growth. 0.92 pounds of Nitrogen is applied to each 1,000 square feet (0.45 kg per 100 sq. meters). Slow release ureaform is combined with quick acting water soluble Nitrogen for steady, long term feeding. Phosphorus and Potash are available for good root and stem development.

The 5% Dacthal in this product will give excellent preemergence control of crabgrass and the following weeds in turf and ornamental plantings:

Carpetweed, Common Chickweed, Fall Panicum, Florida Pussley, Green Foxtail, Hairy Crabgrass, Johnsongrass, Lambsquarters, Lovegrass, Purslane, Smooth Crabgrass, Texas Millet, Witchgrass and Yellow Foxtail.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do Not Hand Spread

Do Not use on Dichondra Lawns or Newly seeded lawns

**STORAGE AND DISPOSAL:** Do not contaminate water, food, feed, seed or other pesticides by storage, disposal or cleaning of equipment.

**PESTICIDE DISPOSAL:** Pesticide spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, state or local procedures.

**CONTAINER DISPOSAL:** Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bag in a sanitary landfill or by incineration if allowed by state and local authorities.

**WHEN TO APPLY:** Agway Greenlawn Plus 20-5-7 with 5% Dacthal kills crabgrass and other annual weeds as they germinate. But not after they have rooted. To be effective, application must be before weed seed germination in early spring. Crabgrass seed germination usually

coincides with the time Forsythia blossoms start to fall. A single application in early spring before weed seed germination usually provides control up to three months in areas which commonly experience stands of late-germinating crabgrass and other annual weedy grasses. A second application at half the regular rate can be safely made two months after the first application.

**HOW MUCH TO APPLY:** Apply contents of bag (23# (10.43 kg)) evenly to 5,000 sq. ft. (465 sq. meters) or 4.6# per 1,000 sq. ft. (1.95 kg per 100 sq. meters). Use any lawn spreader in good condition. Do not spread over larger area than recommended as such application would give poor results.

**HOW TO APPLY:** Before making application, lawn should be raked to remove extraneous material. In order to obtain expected results, Agway Greenlawn Plus 20-5-7 with 5% Dacthal should be evenly applied with no skips or misses.

It is suggested that the area be covered twice, the second time at right angles to the first to insure thorough coverage (see attached table).

#### SPREADER SETTING GUIDES\*

Rate Per 100 Sq Meters	1000 Sq Ft	Cyclone B1		Ortha		Scotts		Ortha		Scotts	
		Spinner Type	Spinner Type	Spinner Type	Spinner Type	Drop Type	Drop Type	Drop Type	Drop Type		
		Once Over	Twice Over	Once Over	Twice Over	Once Over	Twice Over	Once Over	Twice Over	Once Over	Twice Over
4.6 kg	10 lbs	5	4	6	3	E	B	4	3 1/2	6	4 1/2

\* NOTE: These settings are furnished as a guide only. age, condition of spreader, speed of operation and roughness of terrain can cause variation in rates applied.

Do not rake the lawn or disturb soil surface after application

Water in lightly if no rain falls within a week after application

**RE-SEEDING:** When some spring seeding is necessary, there should be a delay of approximately 60 days after the application. This delayed seeding improves the survival of desirable grass seedlings. If a re-seeding is done before 60 days after application, the amount of seed should be increased 50% to insure thrifty stands.

An early spring application may be made to newly seeded lawns after they have exhibited greening of newly-sprouted lawn grasses.

#### PRECAUTIONARY STATEMENTS

##### HAZARD TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Do not graze animals on treated areas or feed plant refuse to livestock.

In case of contact, flush eyes with water for 15 min., for skin, wash with plenty of soap and water. Get medical attention if irritation persists.

**ENVIRONMENTAL HAZARDS:** Keep out of lakes, streams or ponds. Do not contaminate water used for irrigation or domestic purposes.

**DISCLAIMER:** Buyer assumes all risks of use, storage, or handling not in strict accordance with directions given herewith.

NOTE: This pesticide is to be sold ONLY in this original unbroken package.
