# J&P MILDEW KING

## DIRECTIONS

USAGE	J&P MILDEW KING	WATER	DILUTION
General	1 ½ Teaspoons	1 Gallon	1:600
Severe Mildew	2 Teaspoons	1 Gallon	1:400
Dormant Spray	4 Teaspoons	1 Gallon	1:200

DO apply when temperatures are rising and foliage is dry; thoroughly cover top and bottom of leaves, and all soft tissues; and apply several light sprayings rather than a single heavy one.

DO NOT combine with other materials; have the foliage wet with spray materials at the end of the day; freeze; or store the mixed solution.

SPRING – For most effective protection, start using J&P Mildew King early in the spring when the first leaf buds start to develop. Spray weekly for the first month, then every 10 days.

SUMMER – When temperatures exceed 80° every afternoon, there is usually little necessity for spraying. When temperatures are below 80°, spray every 10 days.

FALL – Spray weekly in the cooler fall weather.

GREENHOUSE – Use according to directions for outdoor spraying.

## SPECIAL INSTRUCTIONS

*Always spray plants within 24 hours after any rain.*

**DORMANT SPRAYING** – Use a dilution of 1 to 200. Do not apply under adverse drying conditions (when weather is damp or wet, preventing sprayed areas from drying).

**SEVERE MILDEW** – Use a dilution of 1 to 400 to bring the infection under control. Do not spray unusually soft or tender growth, nor at temperatures above 75°. Do not apply under adverse drying conditions. Resume spraying at a 1 to 600 dilution for subsequent applications.

ACTIVE INGREDIENTS: Copper Oleate\* . . . . .30.0%  
INERT INGREDIENT . . . . .70.0%

\*Copper expressed as metallic . . . . .3.0%

## CAUTION

Keep out of reach of children. Harmful if swallowed. Do not use or store near heat or open flame. Wash hands after use. Destroy container when empty.

NET CONTENTS  
16 FL. OZ. (1 PINT)

## GENERAL INFORMATION

J&P Mildew King contains a scientifically-prepared carrier and spreader material which makes it especially effective against POWDERY MILDEW of roses. Mildew King is a blend of surface active ingredients and light mineral spirits, which enables the user to apply a uniform protective coating of organic copper compound to his roses.

USE ON ROSES FOR: Powdery Mildew, Rust and Blackspot. USE ON OTHER FLOWERS AND SHRUBS (such as Begonias, Chrysanthemums, Dahlias, Delphiniums, Sweet Peas, Fuchsias, Camellias, Azaleas) FOR: Powdery Mildew, Leaf Spot, Rust and Flower Blight.

*J&P Mildew King will NOT settle out in the sprayer, does NOT leave an unsightly residue and does NOT stain or discolor leaves or flowers.*
