Subject: Label Amendment – Removing food uses from label (to add fragrances) and reformat label
Product Name: Black Jack Multipurpose 0.5% Insecticide
EPA Registration Number: 8848-73
Application Date: 2/27/2019
Decision Number: 549474

Dear Ms. Davis:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance

EPA Reg. No. 8848-73
Decision No. 549474

with FIFRA section 6. If you have any questions, please contact Autumn Metzger at 703-305-5314, or Metzger.autumn@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Elizabeth Fertich". The signature is written in a cursive style with a large initial "E".

First Aid

If on Skin or Clothing:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Immediately rinse skin with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies call your poison control center at 1-800-222-1222. For product information call toll-free: 1-800-536-3170.	
Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.	

{Note: The First Aid statements' grid format will be used if market label space permits; otherwise a paragraph format will be used.}

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing.

Personal Protective Equipment (PPE)

Wear long sleeved shirt, long pants, socks, shoes and chemical-resistant gloves (such as barrier laminate, nitrile or neoprene rubber or Viton®, selection category E.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate; do not reuse them.

User Safety Recommendations

Users should: wash hands before eating, drinking, chewing gum, using tobacco or using the toilet; immediately remove clothing/PPE if pesticide gets inside, then thoroughly wash and put on clean clothing; immediately remove PPE after handling this product. Wash the outside of gloves before removing. As soon as possible, thoroughly wash and change into clean clothing.

{Products labeled exclusively for indoor uses may omit the following Environmental Hazards statements:}

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean water mark. Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Physical or Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F [(54°C)] may cause bursting.

READ ENTIRE LABEL BEFORE EACH USE.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake Well Before Using

Not For Use on Humans

Use Restrictions

When used indoors: Do not enter or allow others to enter until sprays have dried; until vapors, mists and aerosols have dispersed and the treated area has been thoroughly ventilated. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not breathe vapors or spray mist. Not for broadcast use on indoor residential surfaces. Do not use in aircraft cabins. Do not apply when food is present. Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms, but excluding areas where food may be prepared or held. Non-food areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage areas (after bottling or canning).

{Products not labeled for use on plants may omit the following paragraph:}

Not for use on plants being grown for sale or other commercial use, for commercial seed production or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.

Remove protective cap, hold container upright and spray from a distance of 12-15 inches; (8-10 inches for fabrics such as clothing, furniture and bedding). Test product on an inconspicuous area before applying. Spray until surface is slightly wet, but not to the point of run-off. Over-application may cause damage. Will not stain surfaces or fabrics where water alone causes no damage.

Angoumous Grain Moths and Indian Meal Moths: Close doors and windows. Direct spray into all parts of the room, especially around stored food product containers, pallets and darkened areas. Spray 7-10 seconds for each 1000 cubic feet of space. Keep area closed for 15 minutes following treatment. Spray to the point of dampness but not to run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Ants: Spray trails, nests and structures' points of entry. Spray on ants whenever possible and retreat if reinfestation occurs, but not more than once every 2 weeks.

Black Flies, Blow Flies, Fruit Flies, Gnats, Houseflies, Mosquitoes, Skipper Flies and Small Flying Moths: Close all doors and windows and spray room at the rate of 2-3 seconds per 1000 cubic feet. Direct spray to all parts of the room, especially windows and other light sources that attract these insects. Keep the nozzle in constant motion. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Bed Bugs: Spray mattresses, particularly around tufts and seams. Take beds apart and spray into all joints. After mattress is dry, cover with mattress cover and sheet; do not use mattress without cover. Treat baseboards, moldings and floors. Spray until damp but not to run-off. Retreat if infestation occurs, but not more than once every 2 weeks.

Centipedes, Cockroaches, Crickets, Firebrats, Millipedes, Palmetto Bugs, Pillbugs, [Roaches,] Scorpions, Silverfish, Sowbugs, Spiders and Waterbugs: Spray into hiding places such as cracks and crevices; behind sinks and cabinets; along baseboards and floors; around drains and plumbing, hitting insects with spray whenever possible. Spray to the point of dampness but not run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Carpet Beetles: Spray directly on beetles, floors, baseboards, shelves and carpets. Spray to the point of dampness but not run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

To Control Carpet Beetles and Clothes Moths on wool and other proteinaceous fibers: Remove infested articles from storage then thoroughly brush and air for several hours in sunlight, if possible. Apply spray to empty chests, closets, bureaus and other storages directing the spray into cracks, joints and crevices. Spray to the point of dampness but not run-off. After airing, infested articles may be treated by spraying lightly, keeping nozzle at least 3 feet from fabric to avoid staining.

Exposed stages of Confused Flour Beetles, Grain Mites, Granary Weevils, Red Flour Beetles, Rice Weevils and Saw-toothed Grain Beetles: Spray into cracks and crevices; around cartons or containers; or other areas where these insects tend to congregate. Spray 30 seconds for each 100 square feet of surface. Keep area closed for 45 minutes to 1 hour after treatment. Spray to the point of dampness but not run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks. Infested stored food products in the home must be disposed of in trash.

To [Helps] Control [Kill] House Dust Mites (*Dermatophagoides* spp.): This product [{product name}] controls [helps control] house dust mites that may cause asthma, hay fever, rhinitis, watery eyes and sneezing. One treatment lasts up to 8 weeks [2 months] [60 days]. Vacuum entire area once dry. Since vacuuming stirs dust up into the air, those with allergies should have another person vacuum or should wear a dust mask and use a vacuum with a high efficiency particulate (HEPA) filter. **Upholstery:** Prior to treating fabric area, test the fabric in an inconspicuous area to ensure dyes will not bleed. Hold container upright with nozzle facing away from you. Depress valve and spray from a distance of 8-10 inches. Spray fabric surfaces until damp, but not to the point of run-off. Do not use on delicate

fabrics. Allow furniture to thoroughly dry before using. **Carpets:** Spray over entire carpet area. Hold the nozzle approximately 12-18 inches from the carpet surface and spray in a sweeping motion. Use an overlapping pattern to ensure total coverage. After application, brush the surface of the carpet with a broom or brush to ensure deep penetration. Allow carpet to thoroughly dry before re-entering the treated area. Drying time may be accelerated by using a fan. **Mattresses:** Spray the top, bottom and sides of mattresses until damp, paying particular attention to tufts and seams. Allow to thoroughly dry before using. After mattress is dry, cover with mattress cover and sheet; do not use mattress without cover.

Fleas and Ticks (Adults and Larvae): Remove and thoroughly clean or destroy pet bedding. Spray pet's sleeping quarters, bed, entire floor and floor covering, paying special attention to cracks and crevices; around baseboards; and window and door frames. Infested upholstered furniture may also be treated with this product. Spray to the point of dampness but not run-off. Test upholstery or drapery fabrics in an inconspicuous place before treating entire fabric area.

This product is Step 3 in the {company name's} Lice Control System:

Step 1: Kill lice with {product name}. Reapply in 10 days.

Step 2: Comb out eggs and nits with {product name}.

Step 3: Clean home. Use this product [{product's name}] spray for non-washable items. Wash washable items in hot water and dry in high heat.

To Kill Lice and Louse Eggs: Prior to spraying entire article, spray in an inconspicuous area to test for possible staining or discoloration. Inspect after drying, then proceed to spray entire article. Hold container upright with nozzle pointing away from you. Depress valve and spray from a distance of 8-10 inches. Spray each square foot for 3 seconds. Spray until damp but not to run-off. Allow all sprayed articles to thoroughly dry before use. Spray only those garments and parts of bedding, including mattresses and furniture, that cannot be either laundered or dry cleaned. Do not use on sheets or pillowcases. If lice infestations occur on humans, use a product labeled for use on humans.

For the control of Garden Insects: To kill Aphids, Armyworms, Clover Mites, Exposed Thrips, Japanese Beetles, Lace Bugs, Leafminers, Pavement Ants, Red Mites, Spider Mites and Whiteflies: Using a sweeping motion from a distance of at least 18 inches, directly spray insects whenever possible on African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, crassula, dahlias, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering Jews, zinnias and other ornamentals. Spray in 1 second bursts and be cautious about wetting tender foliage, young plants and new growth. Over-application may cause damage. Do not spray plants when temperature exceeds 90°F (32°C). Reapply if reinfestation occurs, but not more than once every 2 weeks. Spray may be used on plants, as well as a multi-purpose spray in small gardens, and for spot treatments of incipient insect infestations to prevent spreading to large garden areas.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry area inaccessible to children and pets and away from heat, sparks and open flame. Do not freeze. **Pesticide Disposal and Container Handling:** Do not puncture or incinerate! **If empty:** Place in trash or offer for recycling if available. [This container may be recycled in aerosol recycling centers. At present, there are only a few such centers in the country. Before offering for recycling, empty the can by using the product according to the label.] **If partly filled:** Call your local solid waste agency for disposal instructions.

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}

In Case of Fire, Leaking or Damaged Containers, Information may be obtained by calling 1-800-535-5053.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake Well Before Using

Not For Use on Humans

Use Restrictions

When used indoors: Do not allow adults, children or pets to enter the treated area until sprays have dried; until vapors, mists and aerosols have dispersed, and the treated area has been thoroughly ventilated. Do not apply this product in a way that will contact children, either directly or through drift. Except when applying to pets or fabrics, do not allow adults or pets to enter the treated area until sprays have dried or vapors, mists and aerosols have dispersed and the treated area has been thoroughly ventilated. Do not apply this product in a way that will contact adults, children or pets, either directly or through drift. Remove pets, birds and cover fish aquariums before spraying. Cover all food processing surfaces and utensils during treatment or thoroughly wash before use. Cover or remove exposed food. Those with asthma or severe allergies should consult their medical professional before using this product and have someone else apply this product.

When used outdoors: Do not apply this product in a way that will contact children, either directly or through drift. Except when applying to pets or fabrics do not allow adults or pets to enter until sprays have dried. Not for use in outdoor residential misting systems. Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses: 1) treatment to soil or vegetation around structures; 2) applications to lawns, turf and other vegetation; and 3) applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack-and-crevice applications. Do not water the treated area to the point of run-off. Do not apply during rain.

Remove protective cap, hold container upright and spray from a distance of 12-15 inches; (8-10 inches for fabrics such as clothing, furniture and bedding). Test product on an inconspicuous area before applying. Spray until surface is slightly wet, but not to the point of run-off. Over-application may cause damage. Will not stain surfaces or fabrics where water alone causes no damage.

Angoumous Grain Moths and Indian Meal Moths: Close doors and windows. Direct spray into all parts of the room, especially around stored food product containers, pallets and darkened areas. Spray 7-10 seconds for each 1000 cubic feet of space. Keep area closed for 15 minutes following treatment. Spray to the point of dampness but not to run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Ants: Spray trails, nests and structures' points of entry. Spray on ants whenever possible and retreat if reinfestation occurs, but not more than once every 2 weeks.

Black Flies, Blow Flies, Fruit Flies, Gnats, Houseflies, Mosquitoes, Skipper Flies and Small Flying Moths: Close all doors and windows and spray room at the rate of 2-3 seconds per 1000 cubic feet. Direct spray to all parts of the room, especially windows and other light sources that attract these insects. Keep the nozzle in constant motion. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Bed Bugs: Spray mattresses, particularly around tufts and seams. Take beds apart and spray into all joints. After mattress is dry, cover with mattress cover and sheet; do not use mattress without cover. Treat baseboards, moldings and floors. Spray until damp but not to run-off. Retreat if infestation occurs, but not more than once every 2 weeks.

Centipedes, Cockroaches, Crickets, Firebrats, Millipedes, Palmetto Bugs, Pillbugs, [Roaches,] Scorpions, Silverfish, Sowbugs, Spiders and Waterbugs: Spray into hiding places such as cracks and crevices; behind sinks and cabinets; along baseboards and floors; around drains and plumbing, hitting insects with spray whenever possible. Spray to the point of dampness but not to run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

Carpet Beetles: Spray directly on beetles, floors, baseboards, shelves and carpets. Spray to the point of dampness but not run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks.

To Control Carpet Beetles and Clothes Moths on wool and other proteinaceous fibers: Remove infested articles from storage then thoroughly brush and air for several hours in sunlight, if possible. Apply spray to empty chests, closets, bureaus and other storages directing the spray into cracks, joints and crevices. Spray to the point of dampness but not run-off. After airing, infested articles may be treated by spraying lightly, keeping nozzle at least 3 feet from fabric to avoid staining.

Exposed stages of Confused Flour Beetles, Grain Mites, Granary Weevils, Red Flour Beetles, Rice Weevils and Saw-toothed Grain Beetles: Spray into cracks and crevices; around cartons or containers; or other areas where these insects tend to congregate. Spray 30 seconds for each 100 square feet of surface. Keep area closed for 45 minutes to 1 hour after treatment. Spray to the point of dampness but not run-off. Retreat if reinfestation occurs, but not more than once every 2 weeks. Infested stored food products in the home must be disposed of in trash.

To [Helps] Control [Kill] House Dust Mites (*Dermatophagoides* spp.): This product [{product name}] controls [helps control] house dust mites that may cause asthma, hay fever, rhinitis, watery eyes and sneezing. One treatment lasts up to 8 weeks [2 months] [60 days]. Vacuum entire area once dry. Since vacuuming stirs dust up into the air, those with allergies should have another person vacuum or should wear a dust mask and use a vacuum with a high efficiency particulate (HEPA) filter. **Upholstery:** Prior to treating fabric area, test the fabric in an inconspicuous area to ensure dyes will not bleed. Hold container upright with nozzle facing away from you. Depress valve and spray from a distance of 8-10 inches. Spray fabric surfaces until damp, but not to the point of run-off. Do not use on delicate fabrics. Allow furniture to thoroughly dry before using. **Carpets:** Spray over entire carpet area. Hold the nozzle approximately 12-18 inches from the carpet surface and spray in a sweeping motion. Use an overlapping pattern to ensure total coverage. After application, brush the surface of the carpet with a broom or brush to ensure deep penetration. Allow carpet to thoroughly dry before re-entering the treated area. Drying time may be accelerated by

using a fan. **Mattresses:** Spray the top, bottom and sides of mattresses until damp, paying particular attention to tufts and seams. Allow to thoroughly dry before using. After mattress is dry, cover with mattress cover and sheet; do not use mattress without cover.

Fleas and Ticks (Adults and Larvae): Remove and thoroughly clean or destroy pet bedding. Spray pet's sleeping quarters, bed, entire floor and floor covering, paying special attention to cracks and crevices; around baseboards; and window and door frames. Infested upholstered furniture may also be treated with this product. Spray to the point of dampness but not run-off. Test upholstery or drapery fabrics in an inconspicuous place before treating entire fabric area.

This product is Step 3 in the {company name's} Lice Control System:

Step 1: Kill lice with {product name}. Reapply in 10 days.

Step 2: Comb out eggs and nits with {product name}.

Step 3: Clean home. Use this product [{product's name}] spray for non-washable items. Wash washable items in hot water and dry in high heat.

To Kill Lice and Louse Eggs: Prior to spraying entire article, spray in an inconspicuous area to test for possible staining or discoloration. Inspect after drying, then proceed to spray entire article. Hold container upright with nozzle pointing away from you. Depress valve and spray from a distance of 8-10 inches. Spray each square foot for 3 seconds. Spray until damp but not to run-off. Allow all sprayed articles to thoroughly dry before use. Spray only those garments and parts of bedding, including mattresses and furniture, that cannot be either laundered or dry cleaned. Do not use on sheets or pillowcases. If lice infestations occur on humans, use a product labeled for use on humans.

For the control of Garden Insects: To kill Aphids, Armyworms, Clover Mites, Exposed Thrips, Japanese Beetles, Lace Bugs, Leafminers, Pavement Ants, Red Mites, Spider Mites and Whiteflies: Using a sweeping motion from a distance of at least 18 inches, directly spray insects whenever possible on African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, crassula, dahlias, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering Jews, zinnias and other ornamentals. Spray in 1 second bursts and be cautious about wetting tender foliage, young plants and new growth. Over-application may cause damage. Do not spray plants when temperature exceeds 90°F (32°C). Reapply if reinfestation occurs, but not more than once every 2 weeks. Spray may be used on plants, as well as a multi-purpose spray in small gardens, and for spot treatments of incipient insect infestations to prevent spreading to large garden areas.

If the market label includes use directions for use on dogs, the following two statements must appear at the top of the back [side] panel.)

READ ENTIRE LABEL BEFORE EACH USE

FOR PET USE: USE ONLY ON DOGS

To Control Fleas, Ticks and Lice on Dogs: Starting at the tail, stroke against the lay of the hair, spraying the parted fur in short bursts, directly behind the hand to ensure penetrating the coat. Dampen the fur up to the head. Retreat if reinfestation occurs, but not more than once every 2 weeks. Do not spray directly in/on eyes, mouth or genitalia of dogs. Do not use on dogs under 12 weeks of age. Consult a veterinarian before using this product on medicated, debilitated, aged, pregnant or nursing animals. Sensitivities may occur after using any pesticide product for pets. If signs of sensitivity occur, bath your pet with mild soap and rinse with large amounts of water. If signs continue, immediately consult a veterinarian.

Clothing Treatment

Treat only clothing; do not apply to skin.

For protection against Ticks, including those that may carry Lyme disease, and Mosquitoes: Apply product as directed below. For further protection, use in conjunction with an insect repellent registered for direct application to

the skin and utilize the following primary preventive measures: Avoid areas where the pests are found, wear appropriate protective clothing (light-colored, long-sleeved shirt and long pants tucked into socks) and inspect body daily for ticks. Wear pant cuffs inside the socks or footwear to ensure full protection against ticks.

Initial Treatment Instructions:

1. Select a well-ventilated outdoor area protected from wind and lay out the clothing to be treated (as a complete outfit: shirt, trousers and socks).
2. Hold can upright about 6-8 inches from clothing surface and spray with a slow, sweeping motion to lightly moisten the fabric surface.
3. Continue spraying over entire outfit, until a total treatment time of 60 seconds has elapsed and the outer fabric surface is moist enough to cause a slight color change or darkening. Pay special attention to socks, and trouser and shirt cuffs.
4. Turn the clothing over and treat the other side as directed in steps 2 and 3.
5. Hang the treated clothing and allow to dry for at least 2 hours (4 hours under humid conditions) before wearing.
6. One can treats {number} complete outfit[s]. Do not exceed recommended spraying times.

Retreatment Instructions:

This product contains an active ingredient that actually binds to the fabric being treated, providing residual protection that lasts a minimum of 2 weeks, and holds up through several machine washings. **Do not retreat clothing more than once every 2 weeks. Launder clothing at least once before retreating.** Follow the instructions for initial treatment when retreating articles.

Treatment of Nets, Tents, Sleeping Bags and Backpacks

Do not treat the inside of sleeping bags. Spray only the exterior surfaces of tents.

Initial Treatment Instructions:

Select a well-ventilated outdoor area protected from wind and lay out article to be treated. Hold can upright about 6-8 inches from surface of the article and spray with a slow, sweeping motion to lightly moisten the fabric surface. Continue spraying over entire article until the article's outer surface is moist enough to cause a light color change or darkening. Turn the article over and treat the other side as described for the first side. Hang the treated article and allow it to dry for at least 2 hours (4 hours under humid conditions) before using.

Retreatment Instructions:

This product contains an active ingredient that actually binds to the fabric being treated, providing residual protection that lasts a minimum of 2 weeks. **Do not retreat articles more than once every 2 weeks.** Follow the instructions for initial treatment when retreating articles.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry area inaccessible to children and pets and away from heat, sparks and open flame. Do not freeze. **Pesticide Disposal and Container Handling:** Do not puncture or incinerate! **If empty:** Place in trash or offer for recycling if available. [This container may be recycled in aerosol recycling centers. At present, there are only a few such centers in the country. Before offering for recycling, empty the can by using the product according to the label.] **If partly filled:** Call your local solid waste agency for disposal instructions.

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}

In Case of Fire, Leaking or Damaged Containers, Information may be obtained by calling 1-800-535-5053.
