APPLICATIONS:

OKAY ALGAECIDE is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing no visible growth of algae should be cleaned first by using **OKAY ALGAECIDE**.

For pools having just visible algae growth, add an initial dose of 50 to 77 fl. oz. of **OKAY ALGAECIDE** per 10,000 gal. of water, and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and treated pool, add initially 27 to 50 fl. oz. of **OKAY ALGAECIDE** per 10,000 gal. of water.

To keep swimming pools free of visible algae growth, subsequent additions of 9 to 18 fl. oz. of **OKAY ALGAECIDE** per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

For maximum but not of **OKAY ALGAECIDE** should be in the water. The pool is necessary for maximum effectiveness.

OKAY ALGAECIDE should be used with these cautions. It is normally used to treat pools and is effective against algae and a killing of **OKAY ALGAECIDE** can be used in pools treated with chlorine chemicals. However, the amount of those chemicals should be reduced. However, do not mix **OKAY ALGAECIDE** with concentrated liquid household chlorine products.
