P.O. Box 50610
Santa Barbara, CA93150-0610

Subject: Label Notification(s) for Pesticide Registration PR Notice 2007-4 & 2007-1

Dear Mr. Brite:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated August 2, 2011 for:

EPA Registration Number: 9608-3 Termite Prufe®

The Registration Division (RD) has conducted a review of this request for applicability Under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our Records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on non-refillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact Melody Banks on 703 305-5413.

Sincerely,

Richard Gebken
Product Manager 13
Insecticide Branch
Registration Division (7504P)

Termite Prufe™ is effective for all interior and exterior lumber, plywood, logs, and wood-form composite structural components. It can be used for infested wood, as a preventative treatment in existing structures, and for pre-treatment during construction. The solution continues to penetrate deep into wood and does not break down, giving long lasting protection.

Directions for use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Mixing: (1 lb makes 1 gal. - Covers 200 sq. ft.) Fill bucket with about 80% of a gallon of water. While stirring add 1 lb of Termite Prufe powder, then add water to make 1 gal. Stir until dissolved crystal clear, approximately 5 minutes (quicker in warm water). **Note:** Stores indefinitely in sealed plastic container.

Application: Solution can be applied with paint brush, roller or trigger spray bottle. Garden tank sprayer works best for attics, crawl spaces, decks, fences, logs and new construction. Wood surface should be clean, dry and unsealed before treating. Apply solution until wood surface is thoroughly wet. Apply second application after 1 to 24 hours. Applications can also be made by drilling approximately 1/4" holes and injecting solution into wood and/or wall voids. Avoid drilling into plumbing and/or spraying electrical installations. Any white residue can be easily removed or equipment cleaned with warm water and a mild soap solution. Wood should be completely dry (at least 48 hours) before applying paint, varnish or a waterproofing seal. Avoid contact with plant life.

When replacing unsound wood: Treat surrounding area and all sides of new wood with 2 applications before installing.

Pre-treatment during construction: Apply solution to all accessible surfaces of bare wood, plywood and wood-form composite until surface is thoroughly wet. Apply second application after 1 to 24 hours. Apply after roofing and framing are in place and before insulation and dry walls are installed. Protect treated wood from rain.

Note: Correct leaks and moisture exposure that cause infestation. Wood exposed to moisture should be sealed after treatment. Not recommended for portion of wood that is in direct contact with soil. When gluing wood, treat only after glue is dry. We recommend a small patch test before general application.

Precautionary statements:

Hazards to humans and domestic animals. CAUTION: Harmful if swallowed or inhaled. Causes moderate eye irritation. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing before reuse.

First Aid:

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. **If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Environmental hazards: Termite Prufe powder or solution carelessly spilled or applied to cropland or growing plants, including trees and shrubs, may kill or seriously retard plant growth. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Protective equipment: Wear waterproof gloves, eye protection, protective clothing (e.g. long sleeve shirt and shoes) and a MSHA/NIOSH approved dust/mist mask respirator (in confined spaces) when applying solution.

Storage and Disposal: Do not contaminate water, food or feed by storage and disposal. **Storage:** Store in a dry place. Do not store where children or animals may gain access. **Disposal:** If empty: Nonrefillable container.

Do not reuse or refill this container. Place in trash or offer for recycling, if available. **If partly filled: Call your local solid waste agency for disposal instructions.** Never place unused product down any indoor or outdoor drain.

Notice: Neither manufacturer nor seller makes any warranty expressed or implied concerning use of this product other than indicated on label. Buyer assumes all responsibility for safety and use not in accordance with directions. Because of varying conditions affecting use and application, complete prevention of decay by fungi, other organisms or infestations cannot be guaranteed. This product may be used to impart a temporary resistance at these places of attack which may aid in the prevention of immediate reinfestation. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement, particularly where use of other insecticides may pose an odor problem.
