

This is the WAY
FRESH BAIT for NUTRIA
(Myocaster coypus)

Net Weight _____ Pounds

Active Ingredient:

Zinc phosphide:..... 0.75%
Inert Ingredients:..... 99.25%
100.00%

WARNING: Keep Out of Reach of
Children. See ANTIDOTE statements
and other required WARNING and
CAUTION statements on right panel.

EPA Reg. No.
EPA Est. 9691-OR-1

Manufactured by:
MAMMAL SURVEY & CONTROL SERVICE
216 N. Tillamook St.
Portland, Oregon 97227

STOP--READ THIS LABEL BEFORE USE

WARNING: May be fatal if swallowed! Do not breathe dust or fumes. Do not contact with skin. Wash hands after using. Do not contaminate feed and foodstuffs. Do not allow bait to be exposed on bare ground.

Baits should be placed in areas not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes.

FISH AND WILDLIFE CAUTION: This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

ANTIDOTE: Give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep warm. Call a Physician Immediately!

DIRECTIONS FOR USE: For best results nutria should be prebaited with carrot pieces for 3 or 4 days before placing toxic baits. The material used for prebaiting should be the same as that used for the toxic bait.

BAITING METHODS: Place baits in midafternoon. Ground baiting--place 2 to 5 bait pieces adjacent to active runs away from the den. Rafts: Anchor free-floating 4'x4' raft in waterways adjacent to area of damage or activity. Place prebait on raft followed in 3 to 4 days with treated bait. If prebait is not accepted it may be necessary to move the raft 100 feet up or down stream to improve acceptance. Bait boards--Place bait boards in waterways 3 to 4 feet away from the active trail, slide or run. The bait boards (6"x6") are anchored by means of a slender pole through a hole in the middle of the board to allow free floating with changes in the water level. Place 4 pieces of prebait on the board. Follow in 3 to 4 days with treated bait.

DO NOT REUSE THIS CONTAINER: Completely empty the contents and bury the unused chemical at least 18" deep in an isolated location away from water supplies. Burn the empty container completely. Exercise extreme caution and stay well away from the smoke. Do not use the container in any connection with feed, food, or drinking water.
