(PROFESSIONAL STRENGTH)

RESIDUAL INSECTICIDE

BAYGON*

with SYNERGIZED PYRETHRINS

**KILLS FLEAS, BROWN DOG TICKS
AND ROACHES**

(Pleasantly Scented)

See Additional Insects on Right Panel

15-DAY KILLING POWER

**FAST ACTING - KILLS CRAWLING
INSECTS ON CONTACT**

**LONG LASTING - KEEPS ON KILLING
EVEN AFTER SURFACE IS DRY**

ACTIVE INGREDIENTS:

Pyrethrins	0.050%
*Piperonyl butoxide, technical	0.100%
†N-octyl bicycloheptene dicarboximide	0.166%
**2-(1-methylethoxy) Phenyl methylcarbamate	1.000%
Petroleum distillate	0.200%
INERT INGREDIENTS	98.484%
TOTAL	100.000%

*Equivalent to 0.6% (butylcarbityl (6-propyl-piperonyl) ether and 0.2% related compounds)

**MCK 264 Insecticide Synergist

BAYGON* is a Reg. TM of the Parent Company of
Werkstoffwerke Bayer GmbH, Leverkusen
Patent No. 3 111 539

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT—HOLD CONTAINER IN UPRIGHT POSITION TO SPRAY. Direct spray away from face. Hold container 10-12 inches from surface and spray at a rate of 1 foot per second or until surfaces are wet. If reinfestations occur, repeat application as necessary.

FLEAS AND BROWN DOG TICKS: Remove all bedding. Thoroughly spray cracks, crevices, along and behind baseboards, window and door frames, and localized areas of floor and floor coverings where pets normally lie down. Do not spray on pets. Allow the sprayed areas to dry thoroughly. Treat your pet with a registered flea and tick product to control the source of your infestation. Replace bedding before permitting use by animals. For dog kennels, apply to outside runways, window sills and ledges.

ROACHES, WATERBUGS, CRICKETS, AND CENTIPEDES: Thoroughly spray cracks, crevices, baseboards and around garbage containers and other places where insects habitate.

ANTS: Spray ant trails, window frames, door sills and other places where ants may enter. Spray directly on ant hills or on swarming ants outdoors only.

FLIES, MOSQUITOES, GNATS, WASPS: Apply to screens, walls, door and window frames, light fixtures and other outdoor surfaces where insects congregate.

CLOVER MITES, SOWBUGS, AND EARWIGS: Spray window and door sills and other points of entry-outside only. Apply also to outside foundation and porches to ground level.

SILVERFISH AND FIREBRATS: Apply to cracks, baseboards, behind shelving, bookcases and other storage areas.

PAPER NEST WASPS AND MUD DAUBERS: Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.

SCORPIONS AND SPIDERS: Spray directly on pests when possible. Treat surfaces of out buildings and garages where pests hide or congregate. Spray points of entry such as window sills and along crevices.
